## Corporate Risks and Leadership Eduardo E. Mariscotti, 2020-05-13

The context of business has been changing for companies in recent years and following numerous corporate and accounting scandals many countries have increased the number of national and international regulations designed to ensure transparency and compliance with the law. Because of the existence of these new regulations the level of control the severity of sanctions by governments and the amount of the fines for noncompliance have increased dramatically. In parallel with the technological revolution in communications business management has become more transparent and any negative event is uploaded to social networks and shared with an indeterminate number of people. This change in the regulatory sanctioning and technological context has forced large companies to rethink risks investments and budgets to deal in this more complex environment. To transition to this change some companies have included ethics and compliance programs in their corporate agenda along with marketing and sales plans strategies growth targets investment plans and or talent acquisition. While each industry has its particular risks in this book the author describes the essential elements that any effective ethics and compliance program should contain. This book is a source of information that connects yesterday with today. The author shares observations and lessons of the past to suggest corporate leaders implement effective ethics and compliance programs to protect their organizations and themselves. The book covers theories of ethics but with an eye focused on practical application. Risks ethics and compliance are analyzed with an overall vision connected to the reality of business life without getting bogged down in abstract thinking or in technical and regulatory details. Ethics and compliance are disciplines that have increasingly achieved greater recognition in organizations. Thus due to the importance of risk management in the business world and the necessary involvement of the CEO and the board of directors it seems appropriate that executives get access to a book about risks ethics compliance and human resources directed not only to compliance experts but also to any organizational leader. This book is a wake up call that allows business leaders to understand the

benefits of implementing an effective ethics and compliance program that will help members of organizations to make the right decisions and act within the law. If they do, they can better prevent and react to the difficult obstacle course of risks, dangers and threats that organizations face and that may jeopardize the sustainability, resilience and survival of companies.

*Rights of the Child, Mothers and Sentencing* Alice Macharia, 2021-02-22 This book draws international attention to the autonomy of the child accompanying incarcerated mothers and those they leave behind in the community despite being dependent on the convicted caregiver. Adopting a child rights perspective, the study explores how courts could go about sentencing mothers of young children for the commission of criminal offences whilst protecting the rights of the child as envisaged under the United Nations Convention on the Rights of the Child (UNCRC). Drawing on the author's experience as a sentencer in the Kenyan court and with reference to domestic, regional and international law, the book argues that children's rights are presently left in abeyance when their mothers are sentenced to imprisonment and that greater efforts should be made to recognize and give effect to the child's existence as an autonomous equal holder of human rights despite being dependent on the convicted caregiver. It explores the application of precedence as well as the court's discretion in view of the dependent child and concludes that policy reform in this respect calls for change in attitude and approach on women and children's issues. Observing that internationally most women imprisoned with their children fall beneath the custodial threshold set by law, the research examines how current sentencing practices could be reformed and suggests harnessing the Power of Mercy Committee's the Sentencing Guidelines and progressive practices from developed countries in protecting the child's rights by imposing non-custodial sentences for the offending mothers. It is concluded that in all jurisdictions strict accountability for the dependent child should be situated with the judiciary and that the same should be pronounced as a mandatory legal requirement. The book will be a valuable resource for academic researchers and policy makers working in the area of international children's rights law and criminal law.
