[The Gig Economy Revolution: Rethinking Talent Management](#) Dr. Aashish Dhiman, Dr. Pallavi Tyagi, Mr. Mukund Tyagi, Mr. Arpit Walia, 2025-04-25 [Marketing and Advertising in the Online-to-Offline \(O2O\) World](#) Dinana, Hesham

Osama, 2022-10-28 The field of marketing has changed for the good as the lines between the online and the offline worlds continue to blur and merge as new metaverses emerge. The evolution of online to offline and offline to online strategies and business models are transforming the research agenda for academicians and work practices for professionals. Further study on this evolution is required to fully understand the opportunities and future directions. Marketing and Advertising in the Online to Offline O2O World presents an insight into online and offline marketing strategies and practices and focuses on the emerging trend in the online and offline worlds. The book also explores the potential use of emerging technologies such as virtual reality, mixed reality, and big data analytics in different marketing and advertising functions. Covering key topics such as consumer behavior, brand equity, advertising, and brand performance, this reference work is ideal for business owners, industry professionals, managers, administrators, policymakers, researchers, academicians, scholars, practitioners, instructors, and students.

Digitalization and Artificial Intelligence in Courts, 2025-09-25 In an era of rapid technological advancement justice systems around the world stand at the threshold of a profound transformation. Digitalization and artificial intelligence offer unprecedented opportunities to enhance efficiency, broaden access to legal remedies and bring courts closer to citizens. Yet as judicial processes become increasingly digitalized and automated, critical questions arise: how can we ensure transparency, fairness and accountability in online dispute resolution (ODR) and AI-driven systems? What protections must be in place to preserve privacy, uphold fundamental rights and ensure that technology serves rather than undermines the core principles of justice? Positioned at the intersection between technology and justice, *Digitalization and Artificial Intelligence in Courts: Opportunities and Challenges* explores these questions. The first part of the volume considers strategies for bridging the digital divide, explores the potential for process pluralism, outlines data protection requirements and emphasizes the necessity of robust cybersecurity frameworks. It also tackles one of the most pressing concerns of the digital era: fostering trust and legal certainty in a virtual justice system. The second part presents a comparative analysis of selected groundbreaking national and cross-border court digitalization initiatives from England and the United States to China, Pakistan and the European Union. The final part examines the role of AI in courts, offering a critical reflection on its promises and perils from algorithmic bias to the controversial concept of AI judges. Through a rigorous and balanced analysis, the authors map the opportunities and challenges of an increasingly digitalized legal landscape. Essential for legal professionals, policymakers and scholars, *Digitalization and Artificial Intelligence in Courts* serves as a fundamental guide to navigating the future of justice systems and technology in the twenty-first century. Includes a foreword by Lord Briggs of Westbourne, Justice of the Supreme Court of the United Kingdom.

Marketing 2030 : The Future of Customer Engagement Dr. Kiran Kumar, Mr. Chintamanigouda Patil, Dr. Ramesh Chandrahasa, 2025-04-23 The world of marketing has undergone a profound transformation over the past few decades, shaped by rapid technological advancements, shifting consumer expectations and evolving economic landscapes. As we look toward 2030, it becomes evident that the traditional approaches to marketing are no longer sufficient to meet the demands of an increasingly digital, interconnected and sustainability-focused world. In this new era, marketing is not merely about promoting products or services but about building authentic relationships, delivering personalized experiences and addressing the broader societal and environmental concerns of consumers. Businesses must navigate the delicate balance between leveraging cutting-edge technologies such as artificial intelligence, AI augmented reality, AR, and big data, while maintaining trust, transparency and ethical practices. This chapter sets the stage for an exploration of marketing's evolution, the key drivers shaping customer engagement in the future and the emerging trends and technologies poised to redefine how brands interact with their audiences. By understanding these dynamics, marketers can prepare to thrive in a landscape that is as challenging as it is full of opportunity.
