Digital Technology in the Management and Prevention of Diabetes, volume II Yun Shen, Xiantong Zou, Gang Hu, 2025-11-11 Given the success of the previous collection Digital Technology in the Management and Prevention of Diabetes we are pleased to announce the launch of Volume II The field of digital technology in diabetes management and prevention has seen significant advancements in recent years

Diabetes a chronic condition marked by elevated blood sugar levels due to insulin production or efficacy issues poses a growing global health challenge. It affects individuals across all demographics leading to severe complications such as cardiovascular diseases, kidney failure, and vision impairment, thereby diminishing quality of life and increasing mortality rates. The necessity for continuous monitoring and lifestyle adjustments underscores the importance of effective disease management. Digital technology has emerged as a transformative force in healthcare, offering innovative solutions for diabetes management through enhanced risk assessment, diagnosis, treatment, and telemedicine. The integration of health informatics facilitates seamless tracking and personalized care, benefiting both patients and healthcare providers. Despite these advancements, the full potential of digital technology in diabetes care remains underexplored, highlighting the need for further research to fully leverage its capabilities in disease control and prevention. This research topic aims to consolidate and disseminate the latest findings on the role of digital technology in diabetes management and prevention. The primary objective is to gather research reviews, case studies, and opinion pieces that explore the impact and application of digital tools in improving patient outcomes. The collection particularly welcomes clinical trials that investigate new treatments for diabetes through digital technologies such as telemedicine and remote rehabilitation to enhance patient care and management strategies. To gather further insights into the interdisciplinary scope of digital technology in diabetes care, we welcome articles addressing, but not limited to, the following themes: Innovative applications of digital technology in diabetes care; Effectiveness of monitoring tools and diagnostic technology in diabetes; Telemedicine and remote patient monitoring; Identification of at-risk populations; Identification of at-risk populations using artificial intelligence-based technologies; Patient education and engagement by non-face-to-face technologies; Digital intervention strategies; Data analytics and machine learning. Journal of the American Dietetic Association, 2002 Nutrition Abstracts and Reviews, 2005 *Nutrition and Diet Therapy*. Mary Ann Hogan, Daryle Wane, 2003. INTRODUCTION Welcome to the new Prentice Hall Reviews and Rationales Series. This 9-book series has been specifically designed to provide a clear and concentrated review of important nursing knowledge in the following content areas: Child Health Nursing, Maternal Newborn Nursing, Mental Health Nursing, Medical Surgical Nursing, Pathophysiology, Pharmacology, Nursing Fundamentals, Nutrition and Diet Therapy, Fluids and Electrolytes. Often this is the person with the health problem, but it may also be a significant other, relative, friend, or another nurse. Decide whether the stem is a true response stem or a false response stem. With a true response stem, the correct answer will be a true statement, and vice versa. Determine what the question is really asking, sometimes referred to as the issue of the question. Evaluate all answer options in relation to this issue and not strictly to the correctness of the statement in each individual option. Eliminate options that are obviously incorrect, then go back and reread the stem. Evaluate the remaining options against the stem once more. If two answers seem similar and correct, try to decide whether one of them is more global or comprehensive. If the global option includes the alternative option within it, it is likely that the more global

response is the correct answer
