important questions arise when considering what fame is and the way that it influences the way we live Offering the first introductory overview of the key philosophical issues involved in the nature and value of fame and celebrity this edited collection provides a new perspective and voice to the conversation Divided into four parts its first focuses on conceptual differences between fame and celebrity the experience of being famous how celebrities interact with the public and what motivates people to desire or pursue fame The second part of the volume explores fame and virtue as well as the ways in which ethical issues intertwine with fame concluding with an examination of the nature of fame in relation to contemporary online culture As digital technologies expand cultural commentators remark that we are all becoming celebrities scrutinized by the public gaze whether we like it or not This book therefore answers a pressing need for if celebrity culture continues to expand and consume our social lives the case for a philosophical reflection on the nature and value of this culture becomes even more necessary

digital technologies in terms of how young people access the technology to use it as a means of communication a platform for identification and a tool for participation in their larger social world During longstanding and continued experience in the broad field of youth and digital culture we have come to realize that not only is the subject matter increasing in importance at an immeasurable rate but the amount of textbooks and or edited collections has lagged behind considerably There is a lack of sources that fully encapsulate the canon of texts for the discipline or the rich diversity and complexity of overlapping subject areas that create the fertile ground for studying young people s lives and culture The editors hope that this text will occupy some of that void and act as a catalyst for future interdisciplinary collections Young People and Social Media Contemporary Children s Digital Culture will appeal to undergraduate students studying Child and Youth Studies and given the interdisciplinary nature of the collection scholars researchers and students at all levels working in anthropology psychology sociology communication studies cultural studies media studies education and human rights among others Practitioners in these fields will also find this collection of particular interest
