**The European Artificial Intelligence Act** Vera Lúcia Raposo, 2025-10-27 The legal and regulatory landscape for artificial intelligence is shifting and this is the book that will equip you to navigate it with clarity and authority Gathering contributions from leading experts in the field this edited volume provides one of the first in depth examinations of the EU Artificial Intelligence Act AI Act in its final form It is not a mere commentary Rather it delivers a critical and structured analysis of how the AI Act will reconfigure the governance of digital technologies in Europe and beyond The chapters engage closely with the legal text unpacking its architecture regulatory logic and underlying normative choices Key elements of the framework ranging from high risk systems and prohibited

practices to conformity assessments and the institutional role of national authorities are examined in detail with an eye to both doctrinal coherence and regulatory practice. Importantly, the volume situates the AI Act within the broader EU legal landscape, exploring its intersection with instruments such as the General Data Protection Regulation, the Medical Devices Regulation, and other sector-specific regimes. In doing so, it exposes synergies, tensions, and unresolved questions that will shape implementation and enforcement. The analysis is not confined to the European context. Dedicated chapters on the approaches adopted in non-EU jurisdictions provide a comparative dimension, highlighting both shared concerns and diverging regulatory philosophies. The result is a richer understanding of where global AI governance may be heading and how fragmented or coordinated it might become. Designed for legal scholars, practitioners, regulators, and policy experts, this book is more than a reference; it is an indispensable guide to the law that will define Europe's approach to artificial intelligence for years to come.

*Technology, Legal Education and Legal Profession in China and Australia* Shu Zhang, Jie Luo, Peng Guo, 2025-02-04. This book adopts a comparative and empirical approach to the discussion relating to the subject matter. The book compares various selected topics in both China and Australia, drawing attention to historical, contemporary, and international characteristics. Also, in discussing the topics, the authors will conduct surveys and interviews to get first-hand materials and describe the real situations in both countries. To the best knowledge of the authors, this is the first time that this approach has been adopted to compare legal education and the legal profession, focusing on China and Australia. This book introduces legal education and the legal profession in China and Australia to lay a foundation based on which it further compares them. More importantly, this book discusses some selected topics relating to legal education and the legal profession in the context of globalization, the digital age, and COVID-19. The intended readership is an international audience, including students at both undergraduate and graduate levels, legal scholars, and legal practitioners in general, and those in China and Australia in particular. This book intends to analyse the discourse of legal education and identify and create innovative ways of teaching and learning the law in China and Australia. It focuses on research theory and practice within legal education and the legal profession based on imaginative and sophisticated educational thinking from an empirical and comparative perspective. It also takes a broad view of theory and practice relating to legal education and the legal profession. It is sensitive to the diversity of contexts in which law is taught, learned, and practised.
