College Rankings Reed Karaim,CQ Press,2015 The annual rankings of America s colleges and universities such as those published by U S News World Report have become a significant force in U S higher education The rankings have been increasingly influential in shaping the reputation of colleges and universities and swaying students choices for admission Being rated a top tier school can bring an institution more recognition donations and qualified applicants while a low ranking can discourage good students from applying Some lower ranked schools have tried to game the system to move up in the rankings by changing admissions policies or distorting spending priorities Critics question the validity of the criteria used to create the rankings and argue that colleges seeking a higher score have been too quick to shape their policies in ways that hurt students Supporters counter that the rankings provide consumers useful information in an area with few impartial measures of quality **U.S. News: College Rankings** , Presents college rankings provided by U S News and World Report Contains a FAQ section Includes details about the methodology of the rankings the criteria and weights and the category definitions Offers rankings of the top national universities national liberal arts colleges specialty schools campus diversity and Midwestern northern and southern universities Provides a site search engine **Higher Education in the United States** James J. Breaking Ranks Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree

and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
