This contributed book focuses on the strategic role of e logistics in today's dynamic global environment. In *E Logistics* international experts from both academia and industry examine how competitiveness and productivity in transport logistics and supply chain management can be improved using e logistics systems and technologies. A variety of successful e logistics business approaches are discussed covering a range of commercial sectors and transport modes. Separate chapters consider e logistics developments for air freight, rail freight, road freight, sea transport and port systems. Subsequent chapters address in depth support systems for B2C and B2B e-commerce and e-fulfilment, warehouse management, RFID, electronic marketplaces, global supply network visibility and service chain automation. Industry case studies are used to support the discussion. The book also investigates emerging technologies in e logistics and considers what the future might hold in this rapidly changing and developing field. **Informationweek**, 2005
