Foreign Language Education and its Cross-Curricular Links Marek Krawiec, 2017-03-07. This volume focuses on a variety of aspects of foreign language learning and teaching. From a theoretical perspective, it explores the multidimensional character of language classes and delineates ways of developing students' knowledge and skills according to current educational conceptions and postulates. The book is divided into four parts dealing with such notions as foreign language teaching and learning, ICT in foreign language didactics, intercultural components of language education, and CLIL in the contemporary language class. It will be useful to individuals who find the issue of foreign language teaching and learning and its cross-curricular character interesting.

Game Development with Godot 4 Alan Thorn, 2025-11-05. Godot is a rapidly growing free and open-source game engine for creating 2D and 3D games and interactive applications on many platforms, including desktop and mobile. There has been intense interest in this engine among game developers worldwide. This tutorial book offers an accessible, easy-to-follow, and fun introduction to Godot Engine 4 for game developers, both complete newcomers and migrants from alternative game engines like Unity and Unreal. This book practically explores the process of setting up the Godot software for the first time, creating 2D and 3D scenes with interactive elements, and using the GDScript language to create common gameplay elements like first-person controls. Overall, this technical book offers a structured and friendly introduction to many of Godot's impressive features to help you get started at making games as an indie game developer. This book explores nodes, scenes, hierarchies, import workflows, scripting, animations, user interfaces, working with resources, and creating gameplay elements among others.

Sustainable Architecture: A Solution to a Sustainable Sleep-out Design Brief (Volume 2). William

Van Zyl, 2018-07-04 SYNOPSIS This book is about Design and Visual Communication for secondary school students and teachers. It is a very useful resource for primary secondary school teachers and tertiary students who are interested in all aspects of sustainable architecture. Designers and architects could also find it an interesting read. The software Google SketchUp used, discussed and illustrated in this book, is very user friendly. The computer aided drawing program SketchUpMake is freeware which can be downloaded from the Internet. The computer program is very easy to use; very young kids like primary school students and secondary school students can use it. It is a great design program and many tertiary students as well as professional architects and designers make use of it. The advantage is that objects and buildings can be designed in just minutes for example concepts and ideas. Included in the sleep out brief is general research, inspiration, board design, eras, influential architects and design activities that include possible solutions to a sustainable architectural design brief. Extensive content is included on freehand sketches, SketchUp computer aided drawings, elevations, site plans, diagrams, screenshots, biomimetics, assessments and more. The assessment of the chosen building site is presented including weather and climatic factors. Additionally, the author has included links to his YouTube videos, model movement. These videos were specifically included to assist the solution to sustainable architectural briefs. Links to published academic work by the author and much more are also included. See Five House Publishing for more details. Exemplars of secondary school students work, sixteen year olds from a New Zealand Secondary School, are included.
