Protein Breakfast Early Access Deals Review:

Challenges, Opportunities, and Actions for Improved Maternal and Child Nutrition Sonia Hernández-Cordero, Mireya Vilar-Compte, Monica Ancira-Moreno, 2025-04-10 Maternal and child malnutrition in all its forms including undernutrition, underweight, wasting and stunting, deficiencies of micronutrients, overweight and obesity is one of the most pressing global challenges due to its consequences for survival, long term association with chronic diseases as well as its impacts on economic development and productivity at the individual and societal level. Scientific evidence is needed to quantify and document the short and long term causes and consequences of maternal and child malnutrition as this will help to identify, implement and focalize effective, equitable and culturally sensitive interventions and policies. This Research Topic will disseminate innovative research focused on the socioecological and epidemiological context of maternal and child nutrition, the impact of malnutrition on women's and children's health and developmental outcomes across their life span and special attention on approaches and interventions and challenges to address these public health problems.

[Schools, Space and Culinary Capital](#) Gurpinder Singh Lalli, 2022-08-05 This book introduces the notion of culinary capital to investigate socialisation and school mealtime experiences in an academy school based in the UK. Drawing on interviews collated from children, teachers and staff within the school, the text sheds light on food insecurity in society and schools as being major issue in educational policy. The book examines schools as a microcosm for society, with school food space being the playground for socialisation. It shows how forms of culinary capital can be extended in the school dining hall, where social space is negotiated with notions of inclusion and exclusion during mealtime. The book uses gender, class and race to understand the school dining hall as a space where culinary capital can be exchanged and learnt. Thorough research, accompanied by ethnographic visuals, field notes and observations, it also explores the sensory impact of school gardens. As such, the book will be of interest to students, teachers, school leaders, educators and policy makers in the fields of Education, Sociology, Social Policy and Food Studies.
