**Creating Online Tutorials** Hannah Gascho Rempel, Maribeth Slebodnik, 2024-02-14 Today's students rely heavily on electronic resources they expect to be able to access library resources from any location and at any time of the day. Online education is ubiquitous from K-12 through graduate level coursework and is increasingly used in on-the-job training. Libraries must be prepared to guide learners to use library resources when and where they are needed. Thoughtfully designed online tutorials can be the library's answer to providing this point-of-need instruction that learners have come to expect. When librarians don't have the technical expertise needed to create online tutorials, *Creating Online Tutorials: A Practical Guide for Librarians*, Second Edition will help guide them through the basics of designing and producing an online tutorial. Using practical examples, the book leads librarians through the process of creating an online tutorial from start to finish and provides tips and strategies that will be useful to librarians with more experience in designing online tutorials. This detailed roadmap for designing and producing online tutorials covers:

- Is a tutorial the right solution?
- Assessing diverse user needs
- Choosing the right technology
- Selecting and organizing instructional content
- Planning tutorial design elements
- Integrating assessment into tutorial design
- Maintaining and updating tutorials
- Finding online tutorial resources

After reading this book, new tutorial developers will have a practical, adaptable blueprint that enables them to confidently address the creation of their first online tutorials, and experienced developers will learn efficient techniques to create and enhance future tutorials that are attractive, effective teaching tools.

**Producing Masculinity** Michele White, 2019-02-08 Thoughtful, witty, and illuminating, in this book Michele White explores the ways normative masculinity is associated with computers and the Internet and is a commonly enacted online gender practice. Through close readings and a series of case studies that range from wedding forums to men's makeup video tutorials, White considers the ways masculinities are structured through people's collaborations and contestations over the establishment of empowered positions, including debates about such key terms and positions as the nice guy, nerd, bro, and groom. She asserts that cultural notions of masculinity are reliant on figurations of women and femininity and explores cultural conceptions of masculinity and the association of normative white heterosexual masculinity with men and women. A counterpart to her earlier book *Producing Women*, White has crafted an excellent primer for scholars of gender, media, and Internet studies.
