We wrote this book to equip students with the accounting techniques and insights necessary to succeed in today's global business environment. It reflects our combined experience in teaching financial accounting to students at all levels and in several countries. For anyone who pursues a career in business the ability to read, analyse and interpret published financial reports is an essential skill. Financial Accounting using IFRS is written for future business leaders who want to understand how financial statements are prepared and how the information in published financial reports is used by investors, creditors, financial analysts and managers. Our goal is to provide the most engaging, relevant and accessible textbook available. TARGET AUDIENCE: Financial Accounting using IFRS is intended for use in the first financial accounting course at either the undergraduate or graduate level at universities that want to teach IFRS. U.S. GAAP is not covered. This book balances the preparation of financial statements with their analysis and interpretation. This book accommodates mini courses lasting only a few days as well as extended courses lasting a full semester. Financial Accounting using IFRS is real world oriented and focuses on the most salient aspects of accounting. It teaches students how to read, analyse and interpret financial accounting data to make informed business decisions. To that end it consistently incorporates real company data both in the body of each chapter and throughout the assignment material.
