 Law,2017-04-25 Predictably Irrational meets Moneyball in ESPN veteran writer and statistical analyst Keith Law s
 iconoclastic look at the numbers game of baseball proving why some of the most trusted stats are surprisingly wrong
 explaining what numbers actually work and exploring what the rise of Big Data means for the future of the sport For decades
 statistics such as batting average saves recorded and pitching won lost records have been used to measure individual players
 and teams potential and success But in the past fifteen years a revolutionary new standard of measurement sabermetrics has
 been embraced by front offices in Major League Baseball and among fantasy baseball enthusiasts But while sabermetrics is
 recognized as being smarter and more accurate traditionalists including journalists fans and managers stubbornly believe
 that the old way a combination of outdated numbers and gut instinct is still the best way Baseball they argue should be run
 by people not by numbers In this informative and provocative book teh renowned ESPN analyst and senior baseball writer
 demolishes a century s worth of accepted wisdom making the definitive case against the long established view Armed with
 concrete examples from different eras of baseball history logic a little math and lively commentary he shows how the
 allegiance to these numbers dating back to the beginning of the professional game is firmly rooted not in accuracy or success
 but in baseball s irrational adherence to tradition While Law gores sacred cows from clutch performers to RBIs to the
 infamous save rule he also demystifies sabermetrics explaining what these new numbers really are and why they re vital He
 also considers the game s future examining how teams are using Data from PhDs to sophisticated statistical databases to
 build future rosters changes that will transform baseball and all of professional sports The Hardball Times Baseball
