The Subscription Boom Adam Levinter, 2019-10-08 In this clear and informed guide to the business model that's set to dominate twenty first century commerce Adam Levinter makes a compelling case that the phenomenal success of companies like Amazon Netflix Spotify and Salesforce wouldn't be possible without the foundation they all have in common subscription A surge of subscription boxes in 2012 earned buzz for offering everything from razors to meal kits to underwear since then the model has proven to be adaptable profitable and resilient even as many traditional retailers struggle to stay relevant in the digital economy Levinter takes a close look at the leaders of the subscription economy to pinpoint the essential elements of the model and prove that while the basic concept may be as old as magazines the ubiquity of the internet is enabling a new way for businesses to scale and succeed The Subscription Boom shows that the appeal to both customers and businesses makes subscription a smart play for virtually any business

Attention Economy - Jahresring #60 Brigitte Oetker,Nicolaus Schafhausen,2013 The 60th Jahresring takes the form of a compilation of artist interviews and offers a snapshot of a highly active art scene that stretches from Berlin as a new international center for art Nicolaus Schafhausen put a series of questions to thirty one art practitioners less geared toward the artists respective praxis and more toward the conditions under which it arises Art s presence in the field of new media has never been more pronounced access to media images and Internet based possibilities for research have significantly altered contemporary art production The art market too has changed gaining influence in the

field of contemporary art as even art institutions take a different approach today than they did twenty years ago. The focus in these interviews is on the respective self positioning by the artists in an era shaped by such far reaching changes. What emerges are temporally fixed positions within an activity that is for the most large part associated with precarious working conditions and the logistics of the market more than ever before. This book offers insight into this other dimension of an artist's existence and registers attention economy as a central component of contemporary art production. Should Spotify Bring Voice Assist Technology to the Smart Speaker Market? Christopher Diller, Stewart Pursey, Richard Gentry, 2022 In 2018 Spotify started selling its shares publicly on the New York Stock Exchange The Swedish based start up that launched in 2008 was on its way to becoming the largest music streaming platform in the world At the time it was going public Spotify was used in 61 countries had 159 million active users and hosted a music library of 35 million songs Over the last decade Spotify has focused on increasing its music library available to stream and differentiating its brand from competitors by adding music videos live clips and podcasts to its service It has created a series of personalized playlists based on users preferences and song history It has also begun hosting live events All of these offerings have added to its

popularity and brand loyalty from its streamers However one segment that Spotify has not tapped into an area that its competitors already dominate is the voice assist speaker system market Reports have shown that Spotify is looking to add voice assist capabilities to its platform and in turn considering the development of a proprietary smart speaker device By 2017 the voice assist speaker market had become a global phenomenon valued at USD 4 4 billion and is projected to reach USD 23 3 billion by 2025 Spotify has been focused on maintaining its lead in music streaming but now smart speaker manufacturing companies will be able to disintermediate Spotify as a non essential application breaking its connection to customers But with the current success of Spotify s music streaming platform and its competitors focused on the smart speaker segment that Spotify has no control over Spotify must decide whether or not to follow the first movers and enter the voice assist speaker market
