K. Fields,George R. Matcuk Jr.,Bino A. Varghese,2025-01-03 Increasing interest in the development and validation of quantitative imaging biomarkers for oncologic imaging has in recent years inspired a surge in the field of artificial intelligence and machine learning Initial results showed promise in identifying potential markers of treatment response malignant potential and prognostic predictors among others however while many of these early algorithms showed the optimistic ability to separate pathologic states on in house datasets it was often the case that these classifiers generalized poorly on external validation sets and thus were of limited utility in the clinical setting This issue was additionally compounded by the frequent use of data filtering and feature selection techniques in many studies to further bolster the machine learning results in limited case scenarios thereby biasing the overall fit and further reducing generalizability **Learning and Collaboration Technologies** Panayiotis Zaphiris,Andri Ioannou,2024-05-31 This three volume set LNCS 14722 14724 constitutes the refereed proceedings of the 11th International Conference on Learning and Collaboration Technologies LCT 2024 held as part of the 26th International Conference on Human Computer Interaction HCI International 2024 which took place in Washington DC USA during June 29 July 4 2024 The total of 1271 papers and 309 posters included in the HCII 2023 proceedings was carefully reviewed and selected from 5108 submissions The LCT 2024
