Take Control

of Backing Up Your Mac, 5th Edition Joe Kissell, 2025-12-19 Set up a rock solid backup strategy so that you can restore quickly and completely no matter what catastrophe arises Version 5.2 updated December 19 2025 Joe Kissell provides the advice you need to create a Mac backup strategy that protects your data and enables quick recovery He compares backup software services and media to help you make the best choices You'll learn to set up test and maintain backups plus how to restore files after a calamity Creating and maintaining a solid backup plan is essential to anyone who uses a Mac in order to prevent the loss of important data if disaster strikes whether through hardware or software failure theft human error or other mishap In *Take Control of Backing Up Your Mac* Fifth Edition tech expert Joe Kissell explains how to design a sensible backup strategy choose and configure the best backup hardware and software for your needs and understand how to make your backups as painless as possible His advice is equally useful to those who have never had a backup system and those whose backup systems are in need of an update The book delves into the challenges presented by recent versions of macOS M series Macs and the ever changing landscape of Mac backup hardware software and cloud services It explains what you need to know about bootable and non bootable duplicates backup media and disk formats as well as recent changes in Time Machine and the weird world of APFS snapshots It also shows you how to include in your backups files and folders that are stored in the cloud even if there's no local copy of them Using this book you'll learn how to Design or update the ideal backup system If you're starting from scratch you'll find all the information necessary to assemble a reliable and easy to use backup system If you're updating an existing system you'll learn about what's new in hardware software and online services that might affect the way you back up your Mac in the future Choose backup software Apple's Time Machine is both free and easy

to use but it's not the best choice for everyone and even if you do use Time Machine you'll certainly want to supplement it with other tools. You'll learn about key features to look for in a backup app and find tips on using several popular tools. You'll also discover the pros and cons of cloud backup services and get help choosing the right one. An online appendix covers dozens of apps and services. Shop for hardware. Depending on your needs and goals you may need one or more external SSDs or hard drives but the range of options sizes, interfaces, speeds and more can be bewildering. Joe helps you find the best backup hardware whether it's individual SSDs or hard drives, RAIDs, NAS devices or other options. Make and maintain backups. Once you've selected hardware and software you'll need to know how to make your first backup, set up your backups to run unattended and test them regularly to make sure they're working as they should. This includes both versioned backups which contain old file versions and deleted files and for some users bootable or non-bootable data only clones. And you'll learn about strategies for keeping extra backups offsite. Operate Time Machine. If you choose Time Machine for versioned backups you'll learn how to back up and restore individual files and even an entire disk. You'll also discover why and how to encrypt Time Machine backups, how APFS snapshots work inside and outside Time Machine and what to do if Time Machine misbehaves. Deal with unusual backup needs. If you deal with exceptionally large files such as audio and video files, spend a lot of time on the road away from your usual backup hardware, run Windows on your Mac or rely on cloud services to store essential data you'll want to take extra or different steps to make sure everything is safely backed up. You'll also learn various approaches to backing up and restoring data from Apple's Notes app. Manage your media. What happens when a backup drive fills up or becomes so old that you worry about its future reliability? What if you want to archive older files for posterity but not necessarily maintain them as part of your daily backups? Joe explains how to deal with media management tasks such as these. Recover lost data. Backing up data can be easy but restoring it is often more challenging. When you discover that data is missing whether due to a disk error, theft or a simple mistake you need to know the exact steps needed to recover it and get back to work as soon as possible.

Get to know the why and how of machine learning and big data in quantitative investment. *Big Data and Machine Learning in Quantitative Investment* is not just about demonstrating the maths or the coding. Instead it's a book by practitioners for practitioners covering the questions of why and how of applying machine learning and big data to quantitative finance. The book is split into 13 chapters each of which is written by a different author on a specific case. The chapters are ordered according to the level of complexity, beginning with the big picture and taxonomy, moving onto practical applications of machine learning and finally finishing with innovative approaches using deep learning. Gain a solid reason to use machine learning. Frame your question using financial markets laws. Know your data. Understand how machine learning is becoming ever more sophisticated. Machine learning and big data are not a magical solution but appropriately applied they are extremely effective tools for quantitative investment and this book shows you how.

[Tidy Finance with Python](#) Christoph

Scheuch, Stefan Voigt, Patrick Weiss, Christoph Frey, 2024-07-12 This textbook shows how to bring theoretical concepts from finance and econometrics to the data. Focusing on coding and data analysis with Python we show how to conduct research in empirical finance from scratch. We start by introducing the concepts of tidy data and coding principles using pandas, numpy, and plotnine. Code is provided to prepare common open source and proprietary financial data sources CRSP, Compustat, Mergent, FISD, TRACE, and organize them in a database. We reuse these data in all the subsequent chapters which we keep as self-contained as possible. The empirical applications range from key concepts of empirical asset pricing, beta estimation, portfolio sorts, performance analysis, Fama French factors, to modeling and machine learning applications: fixed effects estimation, clustering, standard errors, difference in difference estimators, ridge regression, Lasso, Elastic net, random forests, neural networks, and portfolio optimization techniques. Key Features: Self-contained chapters on the most important applications and methodologies in finance which can easily be used for the reader's research or as a reference for courses on empirical finance. Each chapter is reproducible in the sense that the reader can replicate every single figure, table, or number by simply copying and pasting the code we provide. A full-fledged introduction to machine learning with scikit-learn based on tidy principles to show how factor selection and option pricing can benefit from Machine Learning methods. We show how to retrieve and prepare the most important datasets in financial economics: CRSP and Compustat, including detailed explanations of the most relevant data characteristics. Each chapter provides exercises based on established lectures and classes which are designed to help students to dig deeper. The exercises can be used for self-studying or as a source of inspiration for teaching exercises.
