## **Soul Loss And The Shamanic Story:**

Soul Loss and the Shamanic Story Michael Berman, 2009-03-26 Stories from various cultures and periods of time can be identified which deal with a concept of soul loss that is essentially shamanic. In shamanism soul loss is the term used to describe the way parts of the psyche become detached when we are faced with traumatic situations. In shamanic terms these split off parts can be found in non ordinary reality and are only accessible to those familiar with its topography. Case studies are presented to show how the way soul loss is dealt with by indigenous shamans differs from the way it is treated by neo shamanic practitioners. Stories have traditionally been classified as epics, myths, sagas, legends, folk tales, fairy tales, parables and fables. However, the definitions of the terms have a tendency to overlap, making it difficult to classify and categorize material. For this reason a case can be made for the introduction of a new genre termed the shamanic story, a story that has either been based on or inspired by a shamanic journey, a numinous experience in non ordinary reality or one that contains a number of the elements typical of such a journey. Within this new genre it is proposed that there exists a sub genre shamanic stories that deal specifically with soul loss and examples are presented and analysed to support this hypothesis.

*The Nature of Shamanism and the Shamanic Story* Michael Berman, 2009-03-26 The book makes out a case for the introduction of a new genre of tale, the shamanic story, which has either been based on or inspired by a shamanic journey or contains a number of the elements that are typical of such a journey. The stories featured are the Book of Jonah from the Old Testament, two traditional stories from the Republic of Georgia, The Earth will take its Own and Davit, a contemporary German tale, Bundles and the Korean story of Shimchong the Blindman's Daughter. By making use of textual material from a number of different cultures and times, the intention is to highlight the pervasive influence shamanism has had and to show how the new genre being proposed is a universal one. The research questions addressed include 1 defining what shamanism is, deciding whether it should be classified as a religion, a methodology or a way of life, 2 considering whether a case can be made out for the introduction of a new genre of tale and if so what its characteristics are. It is hoped the book will be of interest not only to those involved in the study of shamanism but also to those whose interest is in the study of literary texts. Since the old bearers of shamanic traditions quite often were and even today are illiterate, the study of their folklore, epic songs, laments, narratives undoubtedly provides a rich source for research.

**Divination and the Shamanic Story** Michael Berman, 2009-03-26 Stories have traditionally been classified as epics, myths, sagas, legends, folk tales, fairy tales, parables or fables. However, the definitions of the terms have a tendency to overlap, making it difficult to classify and categorize material. For this reason a case can be made for the introduction of a new genre termed the shamanic story, a story that has either been based on or inspired by a shamanic journey, a numinous experience in non ordinary reality or one that contains a number of the elements typical of such a journey. Other characteristics include the way in which the stories all tend to contain embedded texts, often the account of the shamanic journey itself, how the number of actors is clearly limited as one

would expect in subjective accounts of what can be regarded as inner journeys and how the stories tend to be used for healing purposes Within this new genre it is proposed that there exists a sub genre shamanic stories that deal specifically with divination and examples are presented and analysed to support this hypothesis By means of textual analysis it can be shown they all share certain attributes in common the identification of which forms the conclusion of the work

**Divination and the Shamanic Story** Michael Berman,2008 Stories have traditionally been classified as epics myths sagas legends folk tales fairy tales parables or fables However the definitions of the terms have a tendency to overlap making it difficult to classify and categorize material For this reason a case can be made for the introduction of a new genre termed the shamanic story a story that has either been based on or inspired by a shamanic journey a numinous experience in non ordinary reality or one that contains a number of the elements typical of such a journey Other characteristics include the way in which the stories all tend to contain embedded texts often the account of the shamanic journey itself how the number of actors is clearly limited as one would expect in subjective accounts of what can be regarded as inner journeys and how the stories tend to be used for healing purposes Within this new genre it is proposed that there exists a sub genre shamanic stories that deal specifically with divination and examples are presented and analysed to support this hypothesis By means of textual analysis it can be shown they all share certain attributes in common the identification of which forms the conclusion of the work

*Shamanic Themes in Armenian Folktales* Michael Berman, 2009-03-26 In Marxist anthropological theory shamanism represented one of the early forms of religion that later gave rise to more sophisticated beliefs in the course of human advancement The premise of Marxism was that eventually at the highest levels of civilization the sacred and religion would eventually die out Znamenski 2007 p 322 Though history has of course since disproved this the theory clearly had a great bearing on what was written in the former Soviet Union about shamanism and also on people's attitudes in the former Soviet Republics towards such practices On the other hand it has been suggested that all intellectuals driven by nationalist sentiments directly or indirectly are always preoccupied with searching for the most ancient roots of their budding nations in order to ground their compatriots in particular soil and to make them more indigenous Znamenski 2007 p 28 Although this might apply to searching for the roots of Christianity in Armenia when it comes to searching for the roots of pagan practices interest on the part of the people of Armenia is generally speaking not so forthcoming This impasse coupled with the effects of the repressions against religions including shamanism unleashed by the Soviet government between the 1930s and 1950s along with the recent surge of interest in the Armenian Orthodox church a backlash to the seventy years of officially sanctioned atheism makes research into the subject no easy business However hopefully this study will at least in some small way help to set the process in motion
