**Soundscapes:**

**Humans and Their Acoustic Environment** Brigitte Schulte-Fortkamp, André Fiebig, Joseph A. Sisneros, Arthur N.

Popper, Richard R. Fay, 2023-04-24 The concept of the Soundscapes includes all of the sounds in one's environment and focuses not only on the sounds itself. Instead, it focuses on the interrelationships between person and activity and place both in space and time. Soundscapes also include influences on the acoustic environment through auditory sensation, its interpretation, and the responses to the acoustic environment in context. The conceptual framework of Soundscapes describes the process of perceiving or experiencing and/or understanding an acoustic environment, highlighting general concepts and their relationships, context, sound sources, acoustic environment, auditory sensation, interpretation of auditory sensation, responses, and outcomes. International Organization for Standardization ISO 12913-1:2014 Acoustics Soundscapes Part Definition and Conceptual Framework ISO Geneva 2014. With soundscapes, one achieves a deeper understanding of the acoustic environment and its effects on people. The ISO standard 12931-1 on soundscapes provides an important and rigorous distinction in the use of Soundscapes. But it is recognizable that some individuals, particularly planners, designers, lay persons, and even those primarily interested in management of the acoustic environment through environmental noise control, will find it convenient to use Soundscapes as a synonym for the physical acoustic environment. When it comes to noise management and urban planning, soundscapes research has the potential to promote healthy urban environments by sharing and incorporating the significant knowledge of all concerned parties. Understandably, this shows that the communication with regard to noise management has to be forced to guarantee that the specifics of Soundscapes, i.e., the relevance of perception, are seriously considered alongside the whole. This book will bridge the gap between soundscapes theory and practice and therefore it will be different from our earlier publications as Soundscapes and the built environment, ed. by J. Kang and B. Schulte-Fortkamp, CRC Press, Taylor and Francis Group, Boca Raton, FL 2016, and also from the respective Special Issues on Soundscapes in 2012 in *The Journal of the Acoustical Society of America*, ed. by B. Schulte-Fortkamp and J. Kang, and also the Special Issue in *Acta Acustica* 2006, ed. by B. Schulte-Fortkamp and D. Dubois, and the E-book on soundscapes. This volume will be driven by the difficult process of standardization of Soundscapes and its evaluation procedures. The main goal of the proposed volume is to present and review the developments in Soundscapes, reflecting the standardization procedure and the diverse inputs, the needs in management and planning in urban acoustic environments. The book will also focus on the difficulties as well as the solutions in interdisciplinary, grounded communication that is, on the one hand, related to science but on the other, to application that needs guidance.

**Promoting Healthy and Supportive Acoustic Environments: Going beyond the Quietness** Francesco Aletta, Jian Kang, 2020-11-04

This book gathers 14 original contributions published in an IJERPH Special Issue that deal with the perception of environmental sounds and how such sounds are likely to affect human quality of life and well-being and the experience of a place. The research focus over the years has been gradually shifting from

treating sound simply as noise and something that cities should get rid of to a potential resource to promote and support community life in public spaces Three main topics or needs to be addressed by researchers and practitioners emerged from this Special Issue 1 the need to re think quietness in cities as something that goes beyond the mere pursuit of silence 2 the need to integrate additional contextual factors in the characterization and management of urban acoustic environments for public health and 3 the need to consider the acoustic quality of indoor spaces as opposed to an outdoor only perspective The contributions collected in this book will hopefully trigger new questions and inform the agenda of future researchers and practitioners in the environmental acoustics domain *Acoustics in the Built Environment: a Challenge for Improving the Quality of Life* Arianna Astolfi, Giuseppina Emma Puglisi, Nicola Prodi, Jian Kang, Louena Shtrepi, Chiara Visentin, 2022-05-30

**Architectural Publications Index**, 2002 **The Acoustic Environment of Care Homes** Jingyi Mu, Jian Kang, 2025-02-21 This book examines the indoor acoustic environment of China's care homes Chapter 1 provides a brief introduction to the current situation in China's care homes This includes the distribution size demand and future development direction of these facilities The chapter then presents an in depth introduction and analysis of the indoor environment of these facilities especially the acoustic environment In Chapter 2 a case study and site investigation are described and these are used to analyse the current state of the acoustic environment in these facilities including the sound pressure level SPL and reverberation time RT Chapter 3 details the perceptions of the elderly regarding the acoustic environment of care homes and the correlation between the sound environment and other physical environments at the facilities Chapter 4 presents the impact of the acoustic environment on the well being of elderly residents and an analysis of the effects of different sound sources on the activities of the elderly The effects of the acoustic environment on physiological indices of the elderly under different sound sources in care homes are analysed in Chapter 5 Finally in Chapter 6 certain improvement strategies for the indoor acoustic environment of care homes are proposed based on the analysis This book is a comprehensive exposition of research on the acoustic environment of care homes in China and is useful reading for researchers in acoustics architecture design engineering and healthcare facilities It could also be used as a scientific introduction for readers interested in this field *Characteristics of Urban Soundscapes Worthy of Preservation* Yihong Jia, Jian Kang, Hui Ma, 2019 *The Aesthetic Principles of Soundscape in Architectural Design and Built Environment* Keda Wang, 2003 This thesis is an attempt to establish a practical way for architectural designers to take advantage of the relationship between soundscape and architectural aesthetics The whole study aides in providing a structural framework by which architectural designers could incorporate acoustic elements into their design with aesthetic concerns rather than for practical purpose The discussions of soundscape and architecture forms are organized in the order of point line plane and space to present my personal observations on the issue Three graphic systems are developed based on the previous researches of soundscape to visualize the coexistence of sonic identities and visual identities in built environment and how

both of them interact to create a multi sensory experience for visitors Among the three systems the Soundscape Map system is particularly introduced to demonstrate some case studies where soundscape elements are successfully employed to strengthen the construction of architectural spaces and forms The goal of this research is to open a door for architectural researchers to discover the interconnection between soundscape and architecture with the hope that the graphic systems introduced could be useful for effective designs with soundscape concerns in built environment
