WEEK1: DEFINITIONS, CHARACTERISTICS AND FUNCTIONS OF GOVERNMENT

WHAT IS GOVERNMENT?

Government may be defined as an organized group of persons who direct and control the affairs of a society, country or state. Government may also be defined as a body of persons or an institution which makes and executes laws for the smooth running of the state.

Furthermore, government as a concept may be defined generally from three main perspectives:

1. Government as an institution of the state e.g. legislature, executive, judiciary, etc.
2. Government as a process or act of governing.
3. Government as an academic field of study

Government as an Institution of the State

This means that government is a machinery, agency or channel through which the will or business of the state is carried out. As an institution of the state, government has three main organs – the executive, legislature and judiciary. Therefore government can be seen as an institution of the state which exercises executive, legislative and judicial functions for the general good of the citizens of the state.

Government as a Process or Act of Governing

This implies the step by step coordination of activities of a country through the use of different policy instruments to oversee the smooth running of a country and its resources. This process involves making of laws, interpreting of laws and adjudication of law. This relates to power and it uses in a state. In carrying out government activities, the legislature makes laws and regulates the excesses of the executive in executing the laws made by the legislature. The judiciary on its part interprets the laws. .
