Landfill Research Trends Albert A. Velinni,2007 This book presents research studies on landfills which are sites for the disposal of waste materials by burial Historically landfills have been the most common methods of organised waste disposal and remain so in many places around the world Landfills may include internal waste disposal sites where a producer of waste carries out their own waste disposal at the place of production as well as sites used by many producers Many landfills are also used for other waste management purposes such as the temporary storage consolidation and transfer or processing of waste material sorting treatment or recycling A landfill also may refer to ground that has been filled in with soil and rocks instead of waste materials so that it can be used for a specific purpose such as for building houses Unless they are stabilised these areas may experience severe shaking or liquefaction of the ground in a large earthquake This book presents research in a field which is demanding and beginning to receive society s attention
