**American Merchant Seaman's Manual** William B. Hayler, 2009-07-06 The Merchant Marine is composed of all the commercial ships of a country and the personnel that man them. The American Merchant Seaman's Manual has been the primary seamanship text and reference book for the American Merchant Marine for more than sixty years. Merchant mariners going to sea for the first time need to know as much about their new job, their ship, the sea and the Merchant Marine as they can. This manual is designed to provide the knowledge that these new seamen need to embark upon their careers at sea. Since the sixth edition was published in 1981, many changes have been made in each new printing. Changes in this new edition include: A new chapter on Standards of Training, Certification and Watchkeeping for Seafarers; Data on merchant fleets throughout the world; A revised chapter on wire rope; A bibliography for sources of additional reading.

### **Translation as Advocacy**

Various, 2024-04-25 What does it mean to advocate in translation for translation through translation? What does advocacy look like for those who do the translating or for those whose work is translated? To what extent is translation itself a form of advocacy? These are the questions that drive this collection. *Translation as Advocacy* highlights the innovative ways in which translator academics in seven different fields discuss their practice in relation to their understanding of advocacy. The book aims to encourage people to think about translators as active agents bringing new work into the receiving culture, advocating for the writers they translate for, ideas for practices. As such, the book asserts that the act of translation is a mode of cultural production and a political intervention through which the translator as advocate claims a significant position in intercultural dialogue. Featuring seven interrelated chapters, the book covers themes of judgement spaces for translation, classroom practice, collaboration, intercultural position, textuality and voice. Each chapter explores the specific demands of different types of translation work, the specific role of each stage of the process and what advocacy means at each of these stages. For example, choosing what is translated, mediating between author and receiving culture, pitching to publishers, social interactions, framing the translation for different audiences, teaching, creating new canons, gatekeepers and prizes, dissemination, marketing and reception. This book repositions the role of the translator academic as an activist who uses their knowledge and understanding to bring agency to the complex processes of understanding across time and space. Moving critically through the different stages that the translator academic occupies, using the spaces for research, performance and classroom teaching as springboards for active engagement with the key preoccupations of our times, this book will highlight translation as advocacy for students, educators, audiences for translation and the translation industry. Like all the volumes in the *Language Acts and Worldmaking* series, the overall aim is two-fold: to challenge widely held views about language learning as a neutral instrument of globalisation and to innovate and transform language research, teaching and learning together with Modern Languages as an academic discipline by foregrounding its unique form of cognition and critical engagement. Specific aims are to propose new ways of bridging the gaps between those

who teach and research languages and those who learn and use them in everyday contexts from the professional to the personal put research into the hands of wider audiences share a philosophy policy and practice of language teaching and learning which turns research into action provide the research experience and data to enable informed debates on current issues and attitudes in language learning teaching and research share knowledge across and within all levels and experiences of language learning and teaching showcase exciting new work that derives from different types of community activity and is of practical relevance to its audiences disseminate new research in languages that engages with diverse communities of language practitioners Understanding Digital Societies Jessamy Perriam,Simon Carter,2021-03-24
