The Sepsis Text Jean-Louis Vincent, Jean Carlet, Steven M. Opal, 2007-05-08 This textbook is written at the dawn of a new era in the management of sepsis. Recent achievements in the clinical management of septic shock are the culmination of decades of basic and applied research by innovative researchers and clinical investigators worldwide. The contributing authors to this book have spearheaded much of this research and the Editors have endeavored to create a textbook that is comprehensive in nature while maintaining a specific focus upon the multitude of work that constitutes the spectrum of sepsis research including pathophysiology, monitoring systems, general support, microbial aspects, complications, and anti-sepsis therapies.

Innovation in Applied Nursing Informatics Gillian Strudwick, Glynda Rees, Robyn Cook, Young Ji Lee, 2024-07-15 The use of health information technology is becoming ever more essential for the provision of nursing care globally and this has resulted in the need to pay more attention to the innovative use of the technology. This book presents the proceedings of NI2024 the 16th International Congress on Nursing Informatics held from 28-31 July 2024 in Manchester, England. This quadrennial international conference provides one of the most important opportunities for healthcare professionals from around the world to gather and exchange expertise in the research and practice of both basic and applied nursing informatics. The theme of NI2024 is innovation in applied nursing informatics and the book includes all 88 of the full papers presented at the conference as well as 24 case studies and over 100 poster summaries. Topics cover a wide range of themes including applied clinical informatics, education, global health, innovation, and entrepreneurship, public health, population health research and methods, and user-facing technologies. More specifically, some of the topics in focus include generative AI informatics, integration, equity, diversity, and inclusion, technological innovations, patient-centered care, data analytics, the burden of documentation, mobile health, and virtual care. These themes and topics highlight the diversity and breadth of research and innovation in nursing informatics, emphasizing the integration of advanced technologies, the enhancement of education and professional development, and the ongoing effort to improve patient care and health outcomes. The book will be of interest to all those working in the field.
