Google AI Overviews are a feature in Google Search that provides AI-generated summaries of search results, appearing at the top of the results page. They aim to help users quickly understand information from multiple sources, including the web and Google's Knowledge Graph. While designed to be helpful, AI Overviews are still under development and can sometimes be inaccurate or offensive, so users are encouraged to critically evaluate the information and verify it with multiple sources.

Market-Oriented Disinformation Research Carlos Diaz Ruiz, 2025-03-25 Market-Oriented Disinformation Research explores the spread of false or misleading information online through the lens of marketing theory and consumer research. It examines how the business models of digital platforms and advertising technology firms (AdTech) generate digital markets that incentivize the circulation of harmful content for profit. Rather than viewing disinformation and misinformation as accidental byproducts, the book proposes that they thrive in the current markets designed for digital advertising and influencer marketing. Readers will learn how the amplification of disinformation can be linked to social media's business model. Examples include how social media algorithms promote addictive content, how fake news sites use ad fraud to lure in advertising revenue, and how some content creators rely on clickbait, ragebait, bots, and conspiracy theories to boost their

engagement metrics The book is a must read for scholars in journalism media studies and political communication as well as policymakers interested in the democratic governance of social media platforms In addition it calls for digital marketing advertising and brand management professionals to take responsibility for their ad spending by advocating for greater oversight over AdTech intermediaries to prevent unethical actors from monetizing the harmful content that polarizes society and undermines democratic institutions *Higher Education Learning Methodologies and Technologies Online* Pasquale Ardimento,Raffaele Di Fuccio,Giovanni Fulantelli,Pierpaolo Limone,Riccardo Pecori,Paolo Raviolo,Marco Rondonotti,Daniele Schicchi,Davide Taibi,Gianluca Zaza,2025-09-08 The two volume set CCIS 2467 and 2468 constitutes the refereed post conference proceedings of the 6th International Conference on Higher Education Learning Methodologies and Technologies Online HELMeTO 2024 held in Rome Italy during September 25 27 2024 The 46 revised full papers presented in these proceedings were carefully reviewed and selected from 101 submissions The papers are organized in the following topical sections Part I Artificial Intelligence in Education Emerging Technologies and Digital Transformation in Education Part II Inclusion Well being and Student Support Educational Policy Ethics and Teacher Professional Development
