**Inside Jobs** Joe Payne,Jadee Hanson,Mark Wojtasiak,2020-09-29 From data security company Code42 Inside Jobs offers companies of all sizes a new way to secure today s collaborative cultures one that works without compromising sensitive company data or slowing business down Authors Joe Payne Jadee Hanson and Mark Wojtasiak seasoned veterans in the cybersecurity space provide a top down and bottom up picture of the rewards and perils involved in running and securing organizations focused on rapid iterative and collaborative innovation Modern day data security can no longer be accomplished by Big Brother forms of monitoring or traditional prevention solutions that rely solely on classification and blocking systems These technologies frustrate employees impede collaboration and force productivity work arounds that risk

the very data you need to secure. They provide the illusion that your trade secrets, customer lists, patents and other intellectual property are protected. That couldn't be farther from the truth as insider threats continue to grow. These include well-intentioned employees inadvertently sharing proprietary data. Departing employees taking your trade secrets with them to the competition. A high-risk employee moving source code to an unsanctioned cloud service. What's the solution? It's not the hunt for hooded, malicious wrongdoers that you might expect. The new world of data security is built on security acting as an ally versus an adversary. It assumes positive intent, creates organizational transparency, establishes acceptable data use policies, increases security awareness and provides ongoing training. Whether you are a CEO, CIO, CISO, CHRO, general counsel or business leader, this book will help you understand the important role you have to play in securing the collaborative cultures of the future.

*The Science of Intelligent Achievement* Isaiah Hankel, 2017-11-30 Smart strategies for pragmatic science-based growth and sustainable achievement. The Science of Intelligent Achievement teaches you the scientific process of finding success through your most valuable assets. Selective focus: how selective are you with who and what you let into your life. Creative ownership: how dependent are you on others for your happiness and success. Pragmatic growth: how consistently and practically are you growing daily. First, this book will show you how to develop your focus by being very selective with where you spend your mental energy. If you've failed to reach an important goal because you were distracted, misinformed, or overcommitted, then you know the role focus and selectivity play in achievement. Second, you will learn how to stop allowing your happiness and success to be dependent on other people and instead start taking ownership over your life through creative work. Finally, you will learn the art of changing your life through pragmatic decisions and actions. Self-improvement is not the result of dramatic changes. Instead, science has shown that personal and professional change is initiated and sustained by consistent, practical changes. To grow, you must leverage the power of micro decisions, personality, responsibility, and mini-habits. Your own biology will not let you improve your life in any other way. What do you currently value? What are you working to attain? Have you been taught to value

your job title or your relationship with some other person above all else Have you been convinced that the most valuable things in life are your paycheck the number of people who say hello to you at the office and the number of people who say I need you at home Or have you become so passive in what you value that you let anyone and anything into your life as long as whatever you let in allows you to stay disconnected from the cold hard truth that when things really go wrong in your life the only person who will be able to fix it and the only person will be responsible for it is you If so welcome to fake success Passivity dependence and the sacrifice of practical thinking and personal responsibility to fuzzy grandiose ideals and temporary feelings these are markers of fake success Intelligent Achievement on the other hand is not a moving target It s not empty either Instead it s sturdy full and immovable It s not something that s just handed to you It s not something you re nudged to chase or coerced into wanting Intelligent Achievement comes from within you It s a collection of values that are aligned with who you are values you have to protect and nurture These values do not increase your dependence on other people and things Instead they relieve you of dependence This kind of achievement is something that you have a part in building from the ground up you know what s in it you chose it someone else didn t choose it for you Achieving real success means you must focus create and grow daily The Science of Intelligent Achievement will show you how
