Sorvall Rc 4 Manual:

Manual on Membrane Lipids Rajendra Prasad, 2013-11-11 Although previously thought to be merely passive structural components membrane lipids have recently been found to be actively involved in cellular transport and signal transduction processes Clear protocols for the study of membrane lipid properties cellular transport or signal transduction are presented in this manual Following a short introduction to membrane lipids techniques for the isolation and extraction of membrane fractions the analysis of the lipid composition lipid turnover and the involvement in signal transduction as well as the preparation of liposomes are described Molecular Microbial Ecology Manual A.D. Akkermans, Jan Dirk van Elsas, F.J. de Bruijn, 2012-12-06 For a long time microbial ecology has been developed as a distinct field within Ecology In spite of the important role of microorganisms in the environment this group of invisible organisms remained inaccessible to other ecologists Detection and identification of microorganisms remain largely dependent on isolation techniques and characterisation of pure cultures We now realise that only a minor fraction of the microbial community can be cultivated As a result of the introduction of molecular methods microbes can now be detected and identified at the DNA RNA level in their natural environment This has opened a new field in ecology Molecular Microbial Ecology In the present manual we aim to introduce the microbial ecologist to a selected number of current molecular techniques that are relevant in microbial ecology The first edition of the manual contains 33 chapters and an equal number of additional chapters will be added this year Since the field of molecular ecology is in a continuous progress we aim to update and extend the Manual regularly and will invite anyone to deposit their new protocols in full detail in the next edition of this Manual Plant Molecular Biology Manual USA (Ed.).
