Sound Doctrine A Tactical Primer:

Sound Doctrine Charles Heal, 2000-07 In recent years law enforcement has suffered a number of tactical fiascoes Officers and agencies have been the subject of civil and criminal sanctions public confidence has deteriorated and lives have been lost Unlike most tactical books which teach tactics as a skill set this book emphasizes an intuitive application of fundamental principles These principles have evolved over centuries of tactical operations and form a body of sound doctrine Heal not only presents a distillation of the more than ninety tactical texts but provides an insightful and compelling call for rethinking tactics of law enforcement Assuming no prior experience or understanding of tactical matters Heal draws from everyday life such as competitive games driving or planning a vacation to show how to reconceptualize a difficult situation Because of the fundamental concepts Heal explores apply to all types of emergencies Sound Doctrine is suitable for not only law

enforcement but firefighters private security and other emergency responders *Field Command* Charles "Sid" Heal, Sid Heal, 2012 *Field Command* is a first of its kind a full length tactical science textbook focused specifically on crisis situations faced by the law enforcement community It expands on the concepts laid out in Heal's Sound Doctrine A Tactical Primer The concepts and principles are taken from tactical texts and military field manuals and are presented as close to how they are used as possible To facilitate understanding illustrations are abundant and not only clarify the text but amplify it with new insights and applications **Sound doctrine**, 1957 Fifth Dimensional Operations Charles Heal, Robert J.

Bunker, 2014-07-15 Examples of 5th dimensional practical applications derived from advanced weaponry which generates an invisible pain barrier and a video camera infrared attachment which allows for crossing the human sensing dimensional barrier and seeing into barricaded rooms *Red Teams and Counterterrorism Training* Stephen Sloan, Robert J.

Bunker, 2012-09-14 Keeping ahead of terrorists requires innovative up to date training This follow up to Stephen Sloan's pioneering 1981 book *Simulating Terrorism* takes stock of twenty first century terrorism then equips readers to effectively counter it Quickly canvassing the evolution of terrorism and of counterterrorism efforts over the past thirty years co authors Sloan and Robert J Bunker draw on examples from the early 2000s following the World Trade Center and Pentagon attacks to emphasize the need to prevent or respond quickly to active aggressors terrorists who announce their presence and seek credibility through killing Training for such situations requires realistic simulations whose effectiveness the authors show depends on incorporating red teams that is the groups that play the part of active aggressors In *Red Teams and Counterterrorism Training* Sloan and Bunker developers of simulation driven counterterrorist training take readers through the prerequisites for and basic principles of conducting a successful simulation and preparing responders to face threats whether from teenage shooters or from sophisticated terrorist organizations The authors clearly explain how to create an effective red team whose members can operate from within the terrorists mindset An innovative chapter by theater professional Roberta Sloan demonstrates how to use dramatic techniques to teach red teams believable role playing

Rounding out this book a case study of the 2009 shooting at Fort Hood illustrates the cost of failures in intelligence and underscores the still current need for serious attention to potential threats First responders whether civilian or military will find Red Teams and Counterterrorism Training indispensable as they address and deter terrorism now and in the future

Non-state Threats and Future Wars Robert J. Bunker, 2003 The intent behind this book was to bring together a team of defence and national security scholars and real world military and law enforcement operators to focus on the topic of Non State Threats and Future Wars The book is divided into four main sections The first concerns theory The second section concerns non state threats and case studies providing an overview of non state threats ranging from organized crime networks to cartels gangs and warlords The third section is based on counter OPFOR opposing force strategies which detail advanced concepts urban battlespace environmental perceptions weaponry intelligence preparation networked force structure and C4I The fourth and final section contains an archival document from the late 1987 period concerning early Fourth Epoch War theory and never before published interviews with Chechen commanders and officers who participated in combat operations against Russian forces in the 1994 96 war
