## **South Africa And The Powers Behind:**

*The White Redoubt, the Great Powers and the Struggle for Southern Africa, 1960-1980* Filipe Ribeiro de Meneses, Robert McNamara, 2017-12-05 This work examines the attempt by the governments of Portugal Rhodesia and South Africa to defy the drive for African independence in the 1960s and 70s and the international community's response From 1961 to 1974 Portugal Rhodesia and South Africa collaborated in the attempt to preserve white minority rule in their respective territories Hard pressed by African nationalists recently decolonized states and many of the world's Great Powers they supported each other economically politically and militarily turning southern Africa into a major diplomatic concern which defied Cold War logic This book examines how this collaboration came about and how the international community responded to it paying close attention to the evolving situation in each country The Portuguese Revolution of April 1974 undid this white redoubt and the diplomatic policy subsequently adopted by apartheid South Africa did not lead it to sacrifice Rhodesia in return for the illusion of permanent safety A true work of transnational history this book is based on the archival material of eight different countries yet it serves as well as an introduction to the politics of southern Africa during the late colonial era *South Africa* Derek J. Morphet, 1989 [Africa's Power Infrastructure](#) Orvika Rosnes, Maria Shkaratan, 2011 Africa's Power Infrastructure Investment Integration Efficiency is based on the most extensive data collection exercise ever undertaken on infrastructure in Africa the Africa Country Infrastructure Country Diagnostic AICD Data from this study have provided new insights on the extent of a power crisis in the region characterized by insufficient capacity low electricity connection rates high costs and poor reliability and on what can be done about it The continent faces an annual power sector financing gap of about 21 billion with much of the existing spending channeled to maintain and operate high cost power systems leaving little for the huge investments needed to provide a long term solution Meanwhile the power crisis is taking a heavy toll on economic growth and productivity This book asserts that the current impediments to economic growth and development need to be tackled through policies and investment strategies that renew efforts to reform state owned utilities build on the lessons of private participation in infrastructure projects retarget electrification strategies expand regional power trade and mobilize new funding resources Further development of regional power trade would allow Africa to harness larger scale and more cost effective energy sources reducing energy system costs by US 2 billion and carbon dioxide emissions by 70 million tons annually But reaping the promise of regional trade depends on a handful of major exporting countries raising the large volumes of finance needed to develop generation capacity for export it also requires a large number of importing countries to muster the requisite political will With increased utility efficiency and regional power trade in play power costs would fall and full cost recovery tariffs could become affordable in much of Africa This will make utilities more creditworthy and help sustain the flow of external finance to the sector which is essential to close the huge financing gap *U.S. Economic Power And Political Influence In Namibia, 1700-1982* Allan D. Cooper, 2019-06-04 This first comprehensive examination of U S

relations with Namibia offers a critical analysis of the economic and historical determinants of current U S policy in southern Africa Dr Cooper first traces American ties to Namibia dating from the 1700s documenting an extensive commercial interest in the area prior to German colonization Subsequent

**Descent From Power** F. S. Northedge, 2025-02-01 When this book was originally published in 1974 it was the most comprehensive account yet published of British foreign policy from the end of World War II until the entry of Britain into the European Economic Community in 1973 It discusses British relations with Europe the development of the special relationship with the USA British policy in the Middle East and British defence policy The book stresses the influence of economic factors especially the domestic economy and Britain's international economic position on the country's foreign policy

**Human Power** Gry Hasselbalch, 2025-03-12 The rapid and tumultuous technological transformation of our societies has triggered a self-exploratory public debate about what it means to be human What are our human potential talents and powers what essentially is our place in the modern world Will a culture of machines out-compete a culture of humanity In this thought-provoking but ultimately hopeful book scholar and leading technology critic Gry Hasselbalch invites readers to reflect on the shifting dynamics between humans and the AI-powered technologies increasingly shaping our world Exploring the distinctiveness of human power the book addresses current debates about technology that portray humans as powerless and flawed in essence outdated software in dire need of a technological fix arguing that human power must remain central in discussions about AI and technology It investigates seven key traits which set humans apart from machines Creativity Intuition Emotion Life Defiance Love and Wisdom Drawing on interviews and examples from across arts including literature visual arts film and music and from technology politics and policymaking Human Power explains how these traits provide a foundation for a new politics in the AI Machine Age One that does not diminish and reduce human power but actively protects and reinforces it If human power is not a computational process then what is it Human Power Seven Traits for the Politics of the AI Machine Age gives human power our humanity and fundamental humanness a renewed voice in a debate dominated by fears and preconceptions about technological power This important new work will appeal to journalists policymakers artists and educators and anyone else interested in the rapidly growing role of AI and digital technology in our lives
