New Materialist Literary Theory Kerstin Howaldt, Kai Merten, 2024-04-17 This edited collection builds on recent strands in philosophy that promote a critical conceptual return to the material world outside human culture Through the lens of literary analysis and theory it conceptualizes the potential of New Materialism as a timely mode of critique toward the current human condition and its effect on literature and the present Organized around the key New Materialist concepts of entanglement and speculation the chapters by renowned literary scholars and theorists approach literary texts and theory from onto epistemological and speculative realist perspectives Both concepts critically bespeak our precarious relation to matter during the Anthropocene Entanglement analyzes this human inference with the material environment and its consequences while speculation makes palpable our cognitive limits in grasping these consequences and our continued obligation to try to do so Literature emerges as a site where entanglement and speculation as well as their alignment are intensively presented and negotiated In highlighting these connections the chapters in this collection bring entanglement and speculation theory together to form a critical literary theory fit for the Anthropocene

The Comics of Julie Doucet and Gabrielle Bell Tahneer Oksman, Seamus O'Malley, 2018-12-05 Winner of the 2020 Comics Studies Society Edited Book Prize Contributions by Kylie Cardell Aaron Cometbus Margaret Galvan Sarah Hildebrand Frederik Byrn K hlert Tahneer Oksman Seamus O Malley Annie Mok Dan Nadel Natalie Pendergast Sarah Richardson Jessica Stark and James Yeh In a self reflexive way Julie Doucet s and Gabrielle Bell s comics though often autobiographical defy easy categorization In this volume editors Tahneer Oksman and Seamus O Malley regard Doucet s and Bell s art as actively feminist not only because they offer women s perspectives but because they do so by provocatively bringing up the complicated multivalent frameworks of such engagements While each artist has a unique perspective style and worldview the essays in this book investigate their shared investments in formal innovation and experimentation and in playing with questions of the autobiographical the fantastic and the spaces in between Doucet is a Canadian underground cartoonist known for her autobiographical works such as Dirty Plotte and My New York Diary Meanwhile Bell is a British American cartoonist best known for her intensely introspective semiautobiographical comics and graphic memoirs such as the Lucky series and Cecil and Jordan in New York By pairing Doucet alongside Bell the book recognizes the significance of female networks and the social and cultural connections associations and conditions that shape every work of art In addition to original essays this volume republishes interviews with the artists By reading Doucet s and Bell s comics together in this volume housed in a series devoted to single creator studies the book shows how despite the importance of finding a place inside yourself to create this space seems always for better or worse a shared space culled from and subject to surrounding lives experiences and subjectivities

A Poetic History of the Oceans Søren Frank, 2022-07-18

What is the ocean's role in human and planetary history? How have writers, sailors, painters, scientists, historians, and philosophers from across time and space poetically envisioned the oceans and depicted human entanglements with the sea? In order to answer these questions, Søren Frank covers an impressive range of material in *A Poetic History of the Oceans*. Greek, Roman, and Biblical texts, an Icelandic Saga, Shakespearean drama, Jens Munk's logbook, 19th-century writers such as James Fenimore Cooper, Herman Melville, Jules Michelet, Victor Hugo, Jules Verne, Jonas Lie, and Joseph Conrad, as well as their 20th and 21st-century heirs like J.G. Ballard, Jens Bjørneboe, and Siri Ranva Hjelm Jacobsen. *A Poetic History of the Oceans* promotes what Frank labels an amphibian comparative literature and mobilises recent theoretical concepts and methodological developments in Blue Humanities, Blue Ecology, and New Materialism to shed new light on well-known texts and introduce readers to important but lesser-known Scandinavian literary engagements with the sea.

Connie Willis's Science Fiction
Carissa Turner Smith, 2022-10-31 In spite of Connie Willis's numerous science fiction awards and her groundbreaking history as a woman in the field, there is a surprising dearth of critical publication surrounding her work. Taking *Doomsday Book* as its cue, this collection argues that Connie Willis's most famous novel, along with the rest of her oeuvre, performs science fiction's task of cognitive estrangement by highlighting our human inability to read the times correctly and yet also affirming the ethical imperative to attempt to truly observe and record our temporal location. Willis's fiction emphasizes that doomsdays happen every day and they risk being forgotten by some even as their trauma repeats for others. However, disasters also have the potential to upend accepted knowledge and transform the social order for the better, and this collection considers the ways that Willis pairs comic and tragic modes to reflect these uncertainties.

The New Encyclopaedia Britannica: Macropaedia : Knowledge in depth, 2003

Materialism Terry Eagleton, 2017-02-07 A brilliant introduction to the philosophical concept of materialism and its relevance to contemporary science and culture. In this eye-opening, intellectually stimulating appreciation of a fascinating school of philosophy, Terry Eagleton makes a powerful argument that materialism is at the center of today's important scientific and cultural, as well as philosophical, debates. The author reveals entirely fresh ways of considering the values and beliefs of three very different materialists: Marx, Nietzsche, and Wittgenstein, drawing striking comparisons between their philosophies while reflecting on a wide array of topics from ideology and history to language, ethics, and the aesthetic. Cogently demonstrating how it is our bodies and corporeal activity that make thought and consciousness possible, Eagleton's book is a valuable exposition on philosophic thought that strikes to the heart of how we think about ourselves and live in the world.

A Materialist Theory of the Mind D.M. Armstrong, 2002-09-11 Breaking new ground in the debate about the relation of mind and body, David Armstrong's classic text, first published in 1968, remains the most compelling and comprehensive statement of the view that the mind is material or physical. In the preface to this new edition, the author reflects on the book's impact and considers it in the light of

subsequent developments He also provides a bibliography of all the key writings to have appeared in the materialist debate

Immaterialism Graham Harman, 2016-06-27 What objects exist in the social world and how should we understand them Is a specific Pizza Hut restaurant as real as the employees tables napkins and pizzas of which it is composed and as real as the Pizza Hut corporation with its headquarters in Wichita the United States the planet Earth and the social and economic impact of the restaurant on the lives of its employees and customers In this book the founder of object oriented philosophy develops his approach in order to shed light on the nature and status of objects in social life While it is often assumed that an interest in objects amounts to a form of materialism Harman rejects this view and develops instead an immaterialist method By examining the work of leading contemporary thinkers such as Bruno Latour and Levi Bryant he develops a forceful critique of actor network theory In an extended discussion of Leibniz s famous example of the Dutch East India Company Harman argues that this company qualifies for objecthood neither through what it is or what it does but through its irreducibility to either of these forms The phases of its life argues Harman are not demarcated primarily by dramatic incidents but by moments of symbiosis a term he draws from the biologist Lynn Margulis This book provides a key counterpoint to the now ubiquitous social theories of constant change holistic networks performative identities and the construction of things by human practice It will appeal to anyone interested in cutting edge debates in philosophy and social and cultural theory

Contemporary Materialism: Its Ontology and Epistemology Gustavo E. Romero, Javier Pérez-Jara, Lino Camprubí, 2022-06-01 This book provides an up to date revision of materialism s central tenets its main varieties and the place of materialistic philosophy vis a vis scientific knowledge Materialism has been the subject of extensive and rich controversies since Robert Boyle introduced the term for the first time in the 17th century But what is materialism and what can it offer today The term is usually defined as the worldview according to which everything real is material Nevertheless there is no philosophical consensus about whether the meaning of matter can be enlarged beyond the physical As a consequence materialism is often defined in stark exclusive and reductionist terms whatever exists is either physical or ontologically reducible to it This conception if consistent mutilates reality excluding the ontological significance of political economic sociocultural anthropological and psychological realities Starting from a new history of materialism the present book focuses on the central ontological and epistemological debates aroused by today s leading materialist approaches including some little known to an anglophone readership The key concepts of matter system emergence space and time life mind and software are checked over and updated Controversial issues such as the nature of mathematics and the place of reductionism are also discussed from different materialist approaches As a result materialism emerges as a powerful indispensable scientifically supported worldview with a surprising wealth of nuances and possibilities

Discussing New Materialism Ulrike Tikvah Kissmann, Joost van Loon, 2019-02-27 The essays in this volume discuss the various approaches to New Materialism in Sociology and Philosophy They raise the questions of what New Materialism consists of and whether it in

fact should be considered a radical change in Social Theory Are the ideas of a material turn as the theory is formulated and in its assumptions foreshadowed by the classical philosophies of Spinoza and Tarde Do these new approaches bring substantially new perspectives to Social Theory A further goal of these essays is to formulate the methodological and methodical consequences for its empirical implementation What conditions must an ethnography of things fulfill if it is to be sufficient Which participant objects and bodies do the approaches of the various social theories and methodologies include or exclude

The New Materialism J.K. Feibleman, 2012-12-06 A wholly new theory of matter has been advanced in the last half century by modern physics but there has been no new theory of materialism to match it The occurrence of a revolution of such magnitude in science will have to be understood as calling for a corresponding one in philosophy The present work is an attempt to make a start in that direction Grateful acknowledgment is hereby made to the Editors of the following journals for permission to reprint articles which first appeared in their pages to Darshana for Human Nature and Institutions to Diogenes for Full Concreteness and the Re Materialization of Matter to Perspectives in Biology and Medicine for The Ambivalence of Aggression and the Moralization of Man to Philosophy and Phenomenological Research for Formal Materialism Reconfirmed which appears here revised and extended as Formal Materialism The New Version and for Artifactualism The Origin of Man and His Tools to Philosophy

Today for How Abstract Objects Survive to Religious Studies for A Religion for the New Materialism and to Tulane Studies in PhilosoPhy for A Material Theory of Reference PART ONE INTRODUCTION AND METHOD CHAPTER I THE SUBJECTIVE DIGRESSION Every philosophy endeavors to be as comprehensive as possible and when philosophers speak they do so for the whole world **Contemporary Materialism** Paul K. Moser, J. D. Trout, 2002-11 Bringing together for the first time many key articles by leading philosophers this volume charts the problems positions and themes concerning the issue of materialism *Materialism* Robin Brown, James Ladyman, 2019-04-29 The doctrine of materialism is one of the most controversial in the history of ideas For much of its history it has been aligned with toleration and enlightened thinking but it has also aroused strong often violent passions amongst both its opponents and proponents This book explores the development of materialism in an engaging and thought provoking way and defends the form it takes in the twenty first century Opening with an account of the ideas of some of the most important thinkers in the materialist tradition including Epicurus Lucretius Hobbes Hume Darwin and Marx the authors discuss materialism s origins as an early form of naturalistic explanation and as an intellectual outlook about life and the world in general They explain how materialism s beginnings as an imaginative vision of the true nature of things faced a major challenge from the physics it did so much to facilitate which now portrays the microscopic world in a way incompatible with traditional materialism Brown and Ladyman explain how out of this challenge materialism developed into the new doctrine of physicalism Drawing on a wide range of colourful examples the authors argue that although materialism does not have all the answers its humanism and commitment to naturalistic explanation and the scientific method is our best philosophical hope in the ideological maelstrom of the modern world
