$$t_{1/2} = \frac{1}{K[A]_0}$$

$$t_{1/2} = \frac{1}{(7.396 \times 10^{-3})(0.25\text{M})}$$

## **The Second Half Of Life:**

**Finding Meaning in the Second Half of Life** James Hollis, 2005-05-05 What does it really mean to be a grown up in today's world? We assume that once we get it together with the right job, marry the right person, have children and buy a home, all is settled and well. But adulthood presents varying levels of growth and is rarely the respite of stability we expected. Turbulent emotional shifts can take place anywhere between the age of thirty-five and seventy when we question the choices we've made, realize our limitations and feel stuck, commonly known as the midlife crisis. Jungian psychoanalyst James Hollis believes it is only in the second half of life that we can truly come to know who we are and thus create a life that has meaning. In *Finding Meaning in the Second Half of Life*, Hollis explores the ways we can grow and evolve to fully become ourselves when the traditional roles of adulthood aren't quite working for us, revealing a new way of uncovering and embracing our authentic selves. Offering wisdom to anyone facing a career that no longer seems fulfilling, a long-term relationship that has shifted, or family transitions that raise issues of aging and mortality, *Finding Meaning in the Second Half of Life* provides a reassuring message and a crucial bridge across this critical passage of adult development.

**Social Integration in the Second Half of Life** Karl Pillemer, Phyllis Moen, Elaine Wethington, Nina Glasgow, 2003-05-01 Social scientists use the term social integration to refer to individuals' connections with others in their environments. The concept and its consequences have been the subject of considerable study. Many researchers have asserted that meaningful and enduring ties to other persons serve as a buffer against stress and thereby promote physical and mental health. The results are especially pronounced for older persons. *Social Integration in the Second Half of Life* presents integrative reviews of theory and research on this topic. The editors and contributors all currently or previously affiliated with the Cornell Gerontology Research Institute also present new empirical findings of research done at their center. The first section of the book discusses basic theory and principles of social integration in later life and its implications for health. The second, largest section examines specific issues: retirement, driving, family support, housing, neighbors. The third section addresses interventions to promote social integration: transportation, volunteering, and peer support for dementia caregivers. Throughout, the authors focus on the diverging influences of social integration and its converse, social isolation in later life.

**Dream Big** Patricia King, 2011-07-28 At middle age, you are only half finished with God's plan for you. All the hard lessons you learned in the first half of your life serve as a springboard for the fulfillment of your dreams in the second half. Is middle age the beginning of the end or the beginning of the better half of life? Author Patricia King debunks the myths that are constantly thrown by the media that only the youthful are relevant in the world. I was soon turning 40 years of age and I had already fulfilled all my life's goals and dreams. But where should I go from here? Is there anything left to experience? I dreaded waking up the morning of my 40th birthday. But when I realized that half of my life was yet to be lived, I determined that it would be the best half. Life does not end at 40, 60, or 80; it flourishes and gains momentum as you recognize the destiny God designed for all of your days.
