our routine lives *Roots and Wings of Action Research for Territorial Development* Miren Larrea,2024-11-25 No es solo el contenido académico lo que hace especial a este libro. Es la propia concepción de la investigación y su comunicación lo que le convierte en una obra que va mucho más allá de su especialidad: la investigación acción para el desarrollo territorial. Esta obra colectiva coordinada por la investigadora Miren Larrea hace una apuesta decidida por modificar los patrones clásicos de la comunicación científica en absoluta consonancia con la naturaleza de la investigación que proponen sus autores. El libro incorpora distintos tipos de textos para recoger un diálogo entre investigadores y agentes implicados y favorecer así una escucha mutua. Pero además recurre al multilingüismo para que los autores comuniquen mejor lo que quieren comunicar y a quienes deben comunicárselo. Ambas opciones: diversidad de textos y multilingüismo conectan mundos que deben estar ligados: investigadores y actores en lo territorial, lo local y lo internacional; el idioma con la investigación apegada al territorio y lo teórico con lo aplicado. De este modo los autores velan porque la investigación permee y llegue a su destino natural pero también porque crezca gracias al intercambio de conocimientos y experiencias que propician. A través de las formas de comunicación elegidas se pone de manifiesto la necesidad de que la investigación social suceda no solo en el ámbito de lo académico y no solo en inglés. Por eso tiene un valor singular incluso para los no especialistas en este tema que hay que agradecer a su editora al conjunto de coautores y a la editorial Elea Giménez Toledo. Investigadora del CSIC **Complexities of Spiritual Care in Plural Societies** Anne Hege Grung,2022-11-07 This volume contributes to an emerging field that could be referred to as plural spiritual care and chaplaincy. Its innovative approach brings together contributions from a broad range of contexts and religious traditions and includes empirical work and conceptual explorations. It helps to fill the gap between practices and developments related to plural spiritual care and chaplaincy in the scholarly discourse **The Essence of**

Suryanarayana Raju,MR P V S Suryanarayana Raju Raju,2012-02-22 self inquiry is not an effort against the mind but rather a loving way of witnessing the mind which is the result of evolution and contains the whole experience of existence. Your mind is not personal it represents the whole evolutionary process. So self inquiry is an impersonal way of exploring the mind without any reference center. Inquiring mind penetrates into itself aware of one's own psychological being with its urges compulsions frustrations desire to fulfill miseries strains anxieties struggles sorrows and other innumerable problems. In self inquiry there must be constant and earnest awareness. Man is astray. The sin is not to be committed it has already been committed. That is the meaning of the Christian parable that Adam committed the sin the first man. Man is born astray that is the meaning of it we are already in sin. The word sin is very very beautiful. The original root from which it comes means missing the target. Sin does not mean sin it simply means missing the target. We have gone astray from the very beginning man is astray so there's nothing for you to do to go astray. Wherever you are you are missing your goal your target. You don't know who you are you don't know why you are you don't know where you are headed and for what. You just go on like driftwood wherever the winds carry you. Remember this is the first realization I am astray which will make you come back to

the path The moment Adam realized I have committed the sin he was returning back home The moment you realize that whatsoever you are and wherever you are you are wrong It is very difficult to realize it because the mind tries to protect to rationalize The mind belongs to the world It goes on protecting you not exactly you but your astray ness You will have to drop all protections all rationalizations Once you understand that you are astray you suddenly realize that you have nothing to save in this world the wealth the power the prestige nothing is of worth It is all rubbish And you are losing something tremendously valuable for rubbish you are selling yourself and purchasing toys you are destroying the possibility of creating a soul for nothing This is a basic realization the first breakthrough **The Work Of Byron Katie** Edwardo

Theory and Practice of Suryanarayana Raju,2012-02-19 Bhagawan never advised accumulation of information in the name of spirituality His method is self inquiry which is a process of de learning and throwing contents of the mind through understanding Every other spiritual methods require the me to do it Majority of spiritual techniques involve doing in some form or the other But Realization of Self is not an outcome of any doing In self inquiry we don t depend on the me and on the contrary we question the very integrity of the me So a serious seeker of self inquiry does not indulge in accumulation of information in the name of spirituality But average devotee cannot help but reading some spiritual books Bhagawan

advised Rubhu Gita Yoga Vasistam Kaivalya Navaneetam and Tripura Rahasya I have gone through all these books and Rhubhu gita is fully devoted to self inquiry Kaivalya Navaneetam and Tripura Rahasya are extremely useful in deepening our understanding in self inquiry Unlike them Yoga Vasista is not fully devoted to self inquiry because it conveys Vedanta in story form That is their way of presentation But Vasista allotted 300 pages fully to highlight the importance of self inquiry if one want to get released from body identity identity to dogmas and beliefs caste race nationality family gender profession wealth etc It is quite surprising that genius of India opted to inquire into the self rather than running for material gains In this book what is said in Yoga vasista about self inquiry is being conveyed There are two kinds of learning 1 Accumulation of knowledge of experience of technology of a skill of a language It is time bound 2 Psychological learning learning through experience either through the immediate experiences of life which leave a certain residue of non understanding of tradition of race of the society There is no line of demarcation between the two types of learning they overlap What we are concerned in self inquiry is psychological learning that we have acquired through centuries or inherited as tradition as knowledge as experience This we call learning is it learning at all Mind has learned and with what it has learned it meets the challenge of life in the active present It is always translating the life or the new challenge according to what it has learned This is what we are doing in the name of learning Is that learning Does not learning imply something new something I don t know and am I learning if I am merely adding to what I already know then it is no longer learning If you are to discover for yourself what is the new it is no good carrying the burden of the old especially the knowledge of scriptures or a great master A man protecting himself constantly through such knowledge is obviously not a truth seeker When you want to find something new the mind must be quiet If the mind is crowded filled with the facts and borrowed knowledge they act as the impediment to the new The difficulty for most of us is that the mind i e thought has become so important so predominantly significant that it interferes constantly with anything that may be new with anything that may exist simultaneously with the known Thus borrowed knowledge and learning are impediments for those who would seek for those who would try to understand that which is beyond thought and so timeless and eternal
