Schroeder, Helen Fox, Patricia Bizzell, 2002 Patricia Bizzell has argued that teachers of composition if they are going to prepare students for success in other classrooms and other contexts cannot afford to ignore alternative forms of discourse that are appearing now in the academy This edited collection of original essays both discusses and at times exemplifies extraordinary examples of just such alternatives discourses that embody new and different forms of intellectual work Together their writings pose and answer some intriguing questions about the use of nonstandard discourse to illustrate unconventional forms of intellectual work role of nonstandard discourse in scholarship from disciplines across the curriculum theoretical complexities of discourses defined as alternative hybrid mixed or constructed relationships among communities discourses and linguistic standards new conditions in composition classrooms made up of more students of English as a foreign language and students using non standard dialects teacher student relationships within the context of alternative forms of intellectual work Using unconventional structures and formats while acknowledging new modes and methods this provocative volume argues

**Current Index to Journals in Education**, 1991 *A Geopolitics Of Academic Writing* A. Suresh Canagarajah, 2002-12-15 *A Geopolitics of Academic Writing* critiques current scholarly publishing practices exposing the inequalities in the way academic knowledge is constructed and legitimized As a periphery scholar now working in and writing from the center Suresh Canagarajah is uniquely situated to demonstrate how and why contributions from Third World scholars are too often relegated to the perimeter of academic discourse He examines three broad conventions governing academic writing textual concerns matters of languages style tone and structure social customs the rituals governing the interactions of members of the academic community and publishing practices from submission protocols to photocopying and postage requirements Canagarajah argues that the dominance of Western conventions in scholarly communication leads directly to the marginalization or appropriation of the knowledge of Third World communities

*Exploring Academic Writing as Social Practice* Michelle Bedeker, Tsediso Michael Makoelle, Syed Abdul Manan, 2025-10-26 This book poses a provocative question what happens when academic writing is imported not just as a skill set but as an ideology one that dictates whose knowledge counts which

languages belong and how scholarly voice should sound Focusing on English medium instruction EMI universities in Central Asia the book reimagines academic writing as a social practice rooted in power identity and institutional histories Across chapters contributors examine how students and educators negotiate imported norms develop scholarly voice and contest epistemic hierarchies through feedback supervision and writing groups Rather than adopting global prescriptions the book foregrounds local pedagogies culturally embedded challenges and creative responses to writing in EMI university contexts As one of the first regionally grounded academic literacies volumes in Central Asia this book offers essential insights for scholars of writing development decolonial education and the politics of knowledge production in global higher education reform

*Writing/Disciplinarity* Paul Prior, 2013-11-05 Over the past century the explosive growth of scientific technical and cultural disciplines has profoundly affected our daily lives However processes of enculturation in sites such as graduate education that have helped to form these disciplines have received very limited research attention In those sites graduate students write diverse documents including course papers departmental examinations theses and dissertations grant and fellowship applications and disciplinary publications Thus writing is one of the central domains of enculturation an activity through which graduate students and professors display and negotiate disciplinary knowledge genres identities and institutional contexts This volume explores this intersection of writing and disciplinary enculturation through a series of ethnographic case studies These case studies provide the most thorough descriptions available today of the lived experience of graduate seminars combining analysis of classroom talk students texts and professor's written responses institutional contexts students representations of their writing and its contexts and professors representations of their tasks and their

students Given the complexities that the ethnographic data displayed the author found that conventional notions of writing as a process of transcription and of disciplines as unified discourse communities were inadequate As such this book also offers an in depth exploration of sociohistoric theory in relation to writing and disciplinary enculturation Specific case studies introduce apply and further elaborate notions of writing as literate activity authorship as mediated by other people and artifacts classroom tasks as speech genres enculturation as the interplay of authoritative and internally persuasive discourses and disciplinarity as a deeply heterogeneous laminated and dialogic process This blend of research and theory should be of interest to scholars and students in such fields as writing studies rhetoric writing across the curriculum applied linguistics English for academic purposes science and technology studies higher education and the ethnography of communication

*Academic Discourse across Cultures* Igor Lakić, Milica Vuković, Branka Živković, 2015-09-10 Academic discourse has recently become a blooming field of research for linguists interested in genre and discourse analysis as well as pragmatics The methodology and conventions employed in academic discourse however vary across cultures to a certain degree and often represent obstacles for publishing in international journals for authors whose native language is not English as top journals tend to centre on the Anglo Saxon academic writing norms This is one of the major reasons why national academic discourses need to be linguistically profiled and studied and contrastively compared against these norms This volume contributes to this very objective by shedding light on academic discourse as effectuated in various mostly Balkan countries and contrasts it against the corresponding western English discourse Furthermore academic discourse is studied through a variety of genres it can assume such as research articles conference proceedings and university lectures Through exploring the cultural differences in academic discourse and the standards of international academic writing this volume offers readers a chance to become better equipped in publishing abroad Opening with a chapter focusing on the general structure of research articles and national writing habits as a potential hindrance to publishing abroad the book goes on to study the rhetorical structure of the abstracts introductions and conclusions of research articles in linguistics economics and civil engineering The second part of the book deals with hedging contrastively studied in international and national journals with the following chapters studying cohesion as accomplished in academic writing Part three deals with the syntactic and semantic features of academic discourse This book will be of particular interest to linguists interested in genre and discourse analysis in general and academic discourse and will also appeal to scholars from other research backgrounds wishing to familiarise themselves with international and national academic conventions and thus overcome the hurdles relating to academic writing conventions when publishing abroad
