High School Mathematics Lessons to Explore, Understand, and Respond to Social Injustice Robert Q. Berry III, Basil M. Conway IV, Brian R. Lawler, John W. Staley, 2020-03-09 Empower students to be the change, join the teaching mathematics for social justice movement. We live in an era in which students have through various media and their lived experiences a more visceral experience of social economic and environmental injustices. However when people think of social justice mathematics is rarely the first thing that comes to mind. Through model lessons developed by over 30 diverse contributors this book brings seemingly abstract high school mathematics content to life by connecting it to the issues students see and want to change in the world. Along with expert guidance from the lead authors the lessons in this book explain how to teach mathematics for self and community empowerment. It walks teachers step by step through the process of using mathematics across all high school content domains as a tool to explore, understand and respond to issues of social injustice including environmental injustice, wealth inequality, food insecurity and gender, LGBTQ and racial discrimination. This book features Content cross referenced by mathematical concept and social issues. Downloadable instructional materials for student use. User friendly and logical interior design for daily use. Guidance for designing and implementing social justice lessons driven by your own students unique passions and challenges. Timelier than ever teaching mathematics through the lens of social justice will connect content to students daily lives, fortify their mathematical understanding and expose them to issues that will make them responsive citizens and leaders in the future.

Math Workbook Grade 1 Elita Nathan, 2019-05-21 We believe kids get better at math with practice resulting in confidence and positive attitude towards math that is required to excel in school. This workbook provides kids with additional math practice that reinforces and complements what is taught at school. There are no pictures or word problems and focus on mastery of basic addition and subtraction. This workbook combines traditional addition and subtraction math problems with number bond problems. Many elementary schools teach math using Number Bonds and we want kids to have practice on both traditional math questions and number bonds to build fluency and speed in basic arithmetic.
