Ten Most Beautiful Experiments George Johnson, 2011-04. From the acclaimed New York Times science writer George Johnson, an irresistible book on the ten most fascinating experiments in the history of science. Moments when a curious soul posed a particularly eloquent question to nature and received a crisp, unambiguous reply. Johnson takes us to those times when the world seemed filled with mysterious forces when scientists were dazzled by light, by electricity, and by the beating of the hearts they laid bare on the dissecting table. The scientists include Galileo, William Harvey, Isaac Newton, Antoine Laurent Lavoisier, Luigi Galvani, Michael Faraday, James Joule, A.A. Michelson, Ivan Pavlov, and Robert Millikan. 75 drawings restore some of the romance to science.

Her own experiences as a medical practitioner in an era dominated by male counterparts likely informed her dedication to elucidating the scientific method. By synthesizing her extensive knowledge and practical insights, Blackwell interweaves personal narrative with rigorous academic discourse, enriching the reader's experience.
