Ten Lectures on Grammar in the Mind Ewa Dąbrowska,2017-05-01 This volume presents a synthesis of cognitive linguistic theory and research on first and second language acquisition language processing individual differences in linguistic knowledge and on the role of multi word chunks and low level schemas in language production and comprehension It highlights the tension between linguists grammars which are strongly influenced by principles such as economy and elegance and speakers grammars which are often messy less than fully general and sometimes inconsistent and argues that cognitive linguistics is an empirical science which combines study of real usage events and experiments which rigorously test specific hypotheses

Pearls of Functional Algorithm Design Richard Bird,2010-09-16 Richard Bird takes a radical approach to algorithm design namely design by calculation These 30 short chapters each deal with a particular programming problem drawn from sources as diverse as games and puzzles intriguing combinatorial tasks and more familiar areas such as data compression and string matching Each pearl starts with the statement of the problem expressed using the functional programming language Haskell a powerful yet succinct language for capturing algorithmic ideas clearly and simply The novel aspect of the book is that each solution is calculated from an initial formulation of the problem in Haskell by appealing to the laws of functional programming Pearls of Functional Algorithm Design will appeal to the aspiring functional programmer students and teachers interested in the principles of algorithm design and anyone seeking to master the techniques of reasoning about programs in an equational style
