Creating Online Tutorials Hannah Gascho Rempel, Maribeth Slebodnik, 2024-02-14 Today's students rely heavily on electronic resources they expect to be able to access library resources from any location and at any time of the day. Online education is ubiquitous from K-12 through graduate level coursework and is increasingly used in on-the-job training. Libraries must be prepared to guide learners to use library resources when and where they are needed. Thoughtfully designed online tutorials can be the library's answer to providing this point-of-need instruction that learners have come to expect. When librarians don't have the technical expertise needed to create online tutorials, *Creating Online Tutorials: A Practical Guide for Librarians* Second Edition will help guide them through the basics of designing and producing an online tutorial. Using practical examples, the book leads librarians through the process of creating an online tutorial from start to finish and provides tips and strategies that will be useful to librarians with more experience in designing online tutorials. This detailed roadmap for designing and producing online tutorials covers: Is a tutorial the right solution? Assessing diverse user needs; Choosing the right technology; Selecting and organizing instructional content; Planning tutorial design elements; Integrating assessment into tutorial design; Maintaining and updating tutorials; Finding online tutorial resources.

After reading this book, new tutorial developers will have a practical, adaptable blueprint that enables them to confidently address the creation of their first online tutorials, and experienced developers will learn efficient techniques to create and enhance future tutorials that are attractive, effective teaching tools. **Producing Masculinity** Michele White, 2019-02-08 Thoughtful, witty, and illuminating, in this book Michele White explores the ways normative masculinity is associated with computers and the Internet and is a commonly enacted online gender practice. Through close readings and a series of case studies that range from wedding forums to men's makeup video tutorials, White considers the ways masculinities are structured through people's collaborations and contestations over the establishment of empowered positions, including debates about such key terms and positions as the nice guy, nerd, bro, and groom. She asserts that cultural notions of masculinity are reliant on figurations of women and femininity and explores cultural conceptions of masculinity and the association of normative white heterosexual masculinity with men and women. A counterpart to her earlier book *Producing Women*, White has crafted an excellent primer for scholars of gender, media, and Internet studies.

Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets. Platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. *Fascinating and deeply compelling, "The Hidden Psychology of Social Networks" will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative, and in the end, deliver more effective marketing that provides value.*
