Understanding Media Psychology Gayle S. Stever, David C. Giles, J. David Cohen, Mary E. Myers, 2025-07-23

Understanding Media Psychology is an authoritative introductory textbook on the growing field of media psychology. Providing an overview of topics in the field, it summarizes key concepts and theories and considers the importance of media psychology in today's society. The second edition of this bestselling textbook has been fully updated to reflect the changing landscape of media psychology. The new edition features a brand new chapter on news and political media as well as increased focus on AI and new forms of social media. It covers core areas such as positive media psychology, audience research, and the effect of gaming, violence, advertising, and pornography, critically engaging with contemporary discussions around propaganda, fake news, deepfakes, and how media and health psychology interacted during the COVID-19 pandemic and beyond. Written by a team of expert authors, this book will help readers understand the structures, influences, and theories around media psychology. Particular care is also given to addressing the interaction between issues of social justice and the media, as well as the effects media has on both the members of marginalized groups and how those groups are perceived. A student website and instructor resources provide further ways to engage with the content and support teaching and learning. Containing a range of pedagogical features throughout to aid teaching and student learning, including vocabulary and key terms, discussion questions, and boxed examples, this is an essential resource for media psychology courses at the undergraduate and introductory master's levels globally.

Questioning Technology with Jacques Ellul David W.

Gill, Lisa Richmond, 2025-10-07. Twenty-first century technology is an ever-expanding powerful force in virtually every aspect of human life and every corner of the globe. So much of modern technology has resulted in positive improvements in communication, work, health, and other domains. Technology's promises and possibilities for the future are often glowing. But it is one thing for technology to function as a tool serving human purpose and flourishing, and quite another for it to be granted the position of unquestioned master. All technologies deserve to be questioned. What are their costs, trade-offs, and potential or real negative impact? And how do we create limits and controls for technological invasion when these would be wise and necessary? *Questioning Technology with Jacques Ellul* addresses these questions in both the big picture and in their relevance to specific arenas such as art, politics, work, and religion, with voices from not just the academy but also the workplace and society.
