**Mind-Reading and Artificial Intelligence: Past, Present and Future** Prof. (Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings or intentions. Mind Reading has two components: human based and ii) device based artificial intelligence. Artificial Intelligence AI refers to programming computers to do tasks that normally require human intelligence like learning, problem solving and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. This book covers the topics on human based and device based mind reading and interpretation. artificial intelligence that is divided into 32 chapters and the following 8 sections: i) Mind Reading and Artificial Intelligence Introduction and Overview, ii) Human Based Mind Reading, iii) Artificial Intelligence Introduction Types of Learning, iv) Device Based Mind Reading And Virtual Assistants, v) Applications and Opportunities of Artificial Intelligence, vi) Artificial Intelligence Ethical Issues Risks and Regulations, vii) Artificial Consciousness and viii) Artificial Intelligence in India Status and the Way Forward.

**THE EVOLUTION OF CHATGPT: FROM TEXT TO VOICE IN VIRTUAL WORDS** Virendra Pal Singh, Durgesh Kumar, Pankaj Sharma, Dr. Javed Ahmad, Mr. Gaurav Kumar Rajput, 2023-12-12 ChatGPT is an artificial intelligence AI based chatbot that makes use of natural language processing in order to provide conversational discourse that sounds and feels like it was done with a real person. This is accomplished by producing conversational discourse in many languages including English, Japanese and Korean. ChatGPT is a cloud based application that may be accessed using the Azure cloud platform. It was created by Microsoft Research. The language model is able to provide responses to inquiries as well as generate a variety of written material such as emails, posts on social networking sites and posts on platforms that enable users to write in the format of an essay. On November 30, 2022, OpenAI developed ChatGPT, a big language model based chatbot, and made it available to the public. Only the beta version of ChatGPT was first made accessible to users. Through the utilization of this feature, users are provided with the capacity to enhance and lead a discussion in the direction of a desired duration, structure, style, level of information and language. This ability is made available to users. What we refer to as the Chat Generative Pre-trained Transformer is referred to as ChatGPT in its shorter version. In order to determine the context of the dialogue at each level of the discussion, a method known as prompt engineering is utilized. This method involves looking at the prompts and responses that came before it in the conversation. ChatGPT is built on either the GPT 3.5 or the GPT 4 model, both of which are a part of OpenAI's proprietary line of generative pre-trained transformer GPT models. Both models were used in the construction of ChatGPT. Conversational interactions are one of the primary focuses of ChatGPT's design. The Google developed transformer architecture serves as the foundation for these models, which have been modified for use in conversational applications by employing a mix of supervised learning and reinforcement learning strategies. These methods

were utilized in order to get a higher level of precision with the models The research preview version of ChatGPT was made accessible to the general public for the very first time as a free service **Reading Mediated Life Narratives** Amy Carlson,2024-01-25 Calling attention to the unseen mediation and re mediation of life narratives in online and physical spaces this ground breaking exploration uncovers the ever changing strategies that authors artists publishers curators archivists and social media corporations adopt to shape control or resist the auto biographical in these texts Concentrating on contemporary life texts found in the material book museums on social media and archives that present perceptions of individuality and autonomy Reading Mediated Life Narratives exposes the traces of personal cultural technological and political mediation that must be considered when developing reading strategies for such life narratives Amy Carlson asks such questions as what agents act upon these narratives what do the text the creator and the audience gain and what do they lose how do constantly evolving technologies shape or stymie the auto biographical I and finally how do the mediations affect larger issues of social and collective memory An examination of the range of sites at which vulnerability and intervention can occur Carlson does not condemn but stages an intercession showing us how it is increasingly necessary to register mediated agents and processes modifying the witnessing or recuperation of original texts that could condition our reception With careful thought on how we remember how we create and control our pictures voices words and records Reading Mediated Life Narratives reveals how we construct and negotiate our social identities and memories but also what systems control us
