Many of us made a mistake of viewing the financial market with deterministic cycle Even though we knew that market would not show us such a simple prediction pattern we never stop using the concept of deterministic cycle to predict the financial market for example using Fourier transform and other similar techniques Why is that so The reason is simple It is because no one presented an effective way of predicting stochastic cycle Stochastic cycle is the true face of the financial market because many variables in the market are suppressing the predictable cycle with fixed time interval So how we predict the stochastic cycle present in the financial market The key to answer is the Fractal Pattern and Fractal Wave The geometric prediction on Fractal Wave solves the puzzles of the stochastic cycle modelling problem together In another words your intuition more precisely your capability to recognize geometric shape is more powerful than any other technical indicators available in the market Hence the geometric prediction which comes from your intuition would maximize your ability to trade in the financial market In this book Geometric prediction is described as the combined ability to recognize the geometric regularity and statistical regularity from the chart We provide the examples of geometric regularity and statistical regularity In addition we will show you how these regularities are related to your intuition The chart patterns covered in this book include support resistance Fibonacci Price pattern Harmonic Pattern Falling Wedge pattern Rising Wedge pattern and Gann Angles with probability We use these chart patterns to detect geometric regularity Then we use the turning point probability as the mean of detecting statistical regularity In our trading we combine both to improve the trading performance
