**log linear analysis wikipedia** - Sep 15 2023

log linear analysis is a technique used in statistics to examine the relationship between more than two categorical variables  
the technique is used for both hypothesis testing and model building in both these uses models are tested to find the most  
parsimonious i e least complex model that best accounts for the variance in the observed frequencies a pearson s chi square  
test could be used instead of log linear analysis but that technique only allows for two of the variables to be c
