Sand Lime and Other Concrete Bricks Without denying the special merits of other blocks in special circumstances it may be safely asserted that for all ordinary uses there is no better building block than the ordinary brick It has been evolved by thousands of years experience in all parts of the civilised world as the ideal block for hand use Its size varies within narrow limits for instance in Scotland and India it is slightly larger than in England in the United States and Belgium it is slightly smaller But this small variation is in itself a clear testimony to the suitability of the standard to depart from it entirely is merely to make a block that is quite unsuitable for ordinary use In material there is scope for greater variation Within the universal standard material burnt clay there is so wide a range of quality that it would be difficult to go outside it With any other material It is at all times legitimate therefore and in present circumstances profitable to consider the preparation and use of bricks made of materials other than burnt clay About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
