**Naval Research Logistics**, 2005    **Web Developer.com? Guide to Streaming Multimedia** José Alvear, 1998-04-23 This text aims to show readers how to add streaming audio and video capacity to their web site. It gives different approaches to creating streaming and then provides hands on guidance and directions for adding this interactive feature to a site.    [Max Loehr and the Study of Chinese Bronzes](#) Robert W. Bagley, 2008 Max Loehr 1903-1988 the most distinguished historian of Chinese art of his generation is celebrated above all for a 1953 art historical study of Chinese bronzes that effectively predicted discoveries Chinese archaeologists were about to make. Those discoveries in turn overthrew the theories of Loehr's great rival Bernhard Karlgren 1889-1978 a Swedish sinologue whose apparently scientific use of classification and statistics had long dominated Western studies of the bronzes. Revisiting a controversy that was ended by archaeology before the issues at stake were fully understood Robert Bagley shows its methodological implications to be profound. Starting with a close reading of the work of Karlgren he uses an analogy with biological taxonomy to clarify questions of method and to distinguish between science and the appearance of science. Then turning to Loehr he provides the rationale for an art history that is concerned above all with constructing a meaningful history of creative events one that sees the intentionality of designers and patrons as the driving force behind stylistic change. In a concluding chapter he analyzes the concept of style arguing that many classic confusions in art historical theorizing arise from a failure to recognize that style is not a property of objects. Addressed not just to ancient China specialists or historians of Chinese art this book uses Loehr's work on bronzes as a case study for exploring central issues of art history. It will be of interest to anyone concerned with the analysis of visual materials.    [Light Water Reactor Safety Research Program](#) Marshall Berman, 1980    [Advanced Linux Networking](#) Roderick W.
