**Ann R. Karagozian, Luca  
Cortelezzi, Alfredo Soldati**

## **Streaming Top Shows Compare:**

**Spatio-Temporal Stream Reasoning with Adaptive State Stream Generation** Daniel de Leng, 2017-09-08 A lot of today's data is generated incrementally over time by a large variety of producers This data ranges from quantitative sensor observations produced by robot systems to complex unstructured human generated texts on social media With data being so abundant making sense of these streams of data through reasoning is challenging Reasoning over streams is particularly relevant for autonomous robotic systems that operate in a physical environment They commonly observe this environment through incremental observations gradually refining information about their surroundings This makes robust management of streaming data and its refinement an important problem Many contemporary approaches to stream reasoning focus on the issue of querying data streams in order to generate higher level information by relying on well known database approaches Other approaches apply logic based reasoning techniques which rarely consider the provenance of their symbolic interpretations In this thesis we integrate techniques for logic based spatio temporal stream reasoning with the adaptive generation of the state streams needed to do the reasoning over This combination deals with both the challenge of reasoning over streaming data and the problem of robustly managing streaming data and its refinement The main contributions of this thesis are 1 a logic based spatio temporal reasoning technique that combines temporal reasoning with qualitative spatial reasoning 2 an adaptive reconfiguration procedure for generating and maintaining a data stream required to perform spatio temporal stream reasoning over and 3 integration of these two techniques into a stream reasoning framework The proposed spatio temporal stream reasoning technique is able to reason with intertemporal spatial relations by leveraging landmarks Adaptive state stream generation allows the framework to adapt in situations in which the set of available streaming resources changes Management of streaming resources is formalised in the DyKnow model which introduces a configuration life cycle to adaptively generate state streams The DyKnow ROS stream reasoning framework is a concrete realisation of this model that extends the Robot Operating System ROS DyKnow ROS has been deployed on the SoftBank Robotics NAO platform to demonstrate the system's capabilities in the context of a case study on run time adaptive reconfiguration The results show that the proposed system by combining reasoning over and reasoning about streams can robustly perform spatio temporal stream reasoning even when the availability of streaming resources changes

*ECAI 2014* T. Schaub, G. Friedrich, B. O'Sullivan, 2014-08 The role of artificial intelligence AI applications in fields as diverse as medicine economics linguistics logical analysis and industry continues to grow in scope and importance AI has become integral to the effective functioning of much of the technical infrastructure we all now take for granted as part of our daily lives This book presents the papers from the 21st biennial European Conference on Artificial Intelligence ECAI 2014 held in Prague Czech Republic in August 2014 The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI as well as to demonstrate

innovative applications and uses of advanced AI technology Included here are the 158 long papers and 94 short papers selected for presentation at the conference Many of the papers cover the fields of knowledge representation reasoning and logic as well as agent based and multi agent systems machine learning and data mining The proceedings of PAIS 2014 and the PAIS System Demonstrations are also included in this volume which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI      **Manipulation and Control of Jets in Crossflow** Ann R.

Karagozian, Luca Cortelezzi, Alfredo Soldati, 2014-05-04 Fundamental Non Reactive Jets in Crossflow and Other Jet Systems Background on Modeling Dynamical Systems and Control Reactive Jets in Crossflow and Multiphase Jets Controlled Jets in Crossflow and Control via Jet Systems      **Relevant Query Answering over Streaming and Distributed Data** Shima

Zahmatkesh, Emanuele Della Valle, 2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention Answering in a timely fashion i e reactively is one of the most important performance indicators especially when the distributed data is evolving The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time A limited refresh budget guarantees the reactivity of the system Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field      *Using Digital Information Services in the Library Workplace* Marie Keen Shaw, 2022-03-21 Library collections have rapidly evolved from a predominance of print books and journals to an ever growing mix of digital and print resources Support staff are expected to know how to help patrons select and use digital information services such as databases digital collections digital archives ebooks streaming video discovery search products the Internet and user focused library interfaces and applications Yet most library support staff LSS has not had training to become proficient in finding using and instructing others in the wide range of digital library services *Using Digital Information Services in the Library Workplace* An Introduction for Support Staff is an up to date text for professors who teach digital information use and management in library support staff programs and a handbook for those working in libraries who want to keep current as they expand their knowledge and skills This book will help support staff members to Know and use terms and concepts used in digital information services Use digital information services effectively Know how to evaluate and select databases and services Understand issues and trends in the library digital information industry Distinguish key features and enhancements found among vendors and providers of digital libraries digital collections databases and e texts Plan budget and write grants for digital services Understand the complexity and options of licensing and usage agreements for digital information services Know copyright permissions and acceptable use guidelines for digital information services Use government databases and other digitized systems and information sources Locate digital collections of museums universities and other sources that

librarians can share with patrons Understand the concepts of preservation using digital technologies Create local digital resources of primary and historical materials and artifacts with metadata and cataloging for searchable access The Library Support Staff series is aimed for staff that work in libraries and want to enhance their skills college professors who teach library support staff instruction and or students who seek academic credit Each book in the series addresses a specific topic in an academic curriculum for library support staff Content of each book in the series is aligned with American Library Association competencies for accredited programs and learning for library support staff ALA LSSC The text is written in clear language with practical examples of how performance can contribute to exemplary library service Game Bulletin ,1949
