The Matrix Of Derivative Criminal Liability The Matrix Of Derivative Criminal Liability:

The Matrix of Derivative Criminal Liability Gabriel Hallevy, 2012-04-23 Derivative criminal liability includes inchoate offenses criminal attempt conspiracy preparatory offenses etc complicity joint perpetration perpetration through another incitement solicitation accessoryship etc organized crime natural and probable consequences liability post crime aid enterprise liability terrorism and terrorist infrastructure and many more forms of criminal liability clearly making it a major pillar of modern criminal law Although derivative criminal liability affects countries worldwide there is still no general legal theory that covers this issue The objective of the present book is to develop a comprehensive general legally sophisticated and at the same time practical theory of derivative criminal liability The book emphasizes the practicality of the theory to enable courts lawyers legislators attorneys students and academics to apply it in their daily professional occupations **A**

Theory of Punishable Participation in Universal Crimes Terje Einarsen, Joseph Rikhof, 2018-12-07 This study is the second in the four part series entitled Rethinking the Essentials of International Criminal Law and Transitional Justice While the first volume The Concept of Universal Crimes in International Law explored the parameters and theories related to crimes under international law this book examines the notion of punishable participation in such crimes It presents a general theory of personal criminal liability and provides a comprehensive overview of all forms of criminal participation in international law The authors examine numerous primary materials in international and transnational criminal law both historical and current relating to both international and domestic jurisprudence They also review academic literature that attempts to explain and bring consistency to the jurisprudence as well as other sources such as reports of the International Law Commission This rich empirical tapestry is then used to test and further develop an overarching conceptual theory and matrix that provides a better understanding of the boundaries of personal criminal liability *lex lata* and *lex ferenda* and of the relationship between the various forms of punishable participation in universal crimes Like the first volume this book makes a valuable contribution to a more coherent and practical understanding of international criminal law **The Right to Be**

Punished Gabriel Hallevy, 2012-10-12 Does an offender have the right to be punished The right to be punished may sound like an oxymoron but it is not necessarily so With the emergence of modern criminal law the offender gained the right to be punished by rational criminal law rather than being lynched by an angry mob The present day offender may have the right to be punished by doctrinal sentencing rather than being subjected to verdicts based on vague unclear and uncertain principles In modern criminal law the imposition of criminal liability follows accurate and strict rules whereas there are no similar rules for the imposition of punishment The process of sentencing is vague and obscure as are the considerations used for the imposition of punishments The objective of the present book is to propose a comprehensive general and legally sophisticated theory of modern doctrinal sentencing The challenges of such a legal theory are plenty and complex In addition to increasing clarity and certainty modern doctrinal sentencing must deal with modern types of delinquency e g organized crime recidivism

corporate offenders high tech offenses etc and modern principles of criminal law Modern doctrinal sentencing must serve to ensure optimal sentencing Legal Aspects of Autonomous Systems Dário Moura Vicente,Rui Soares Pereira,Ana Alves Leal,2024-01-02 As computational power the volume of available data IT systems autonomy and the human like capabilities of machines increase robots and AI systems have substantial and growing implications for the law and raise a host of challenges to current legal doctrines The main question to be answered is whether the foundations and general principles of private law and criminal law offer a functional and adaptive legal framework for the autonomous systems phenomena The main purpose of this book is to identify and explore possible trajectories for the development of civil and criminal liability for our understanding of the attribution link to autonomous systems and in particular for the punishment of unlawful conduct in connection with their operation AI decision making processes including judicial sentencing also warrant close attention in this regard Since AI is moving faster than the process of regulatory recalibration this book provides valuable insights on its redesign and on the harmonization at the European level of the current regulatory frameworks in order to keep pace with technological changes Providing a broader and more comprehensive picture of the legal challenges posed by autonomous systems this book covers a wide range of topics including the regulation of autonomous vehicles data protection and governance personality rights intellectual property corporate governance and contract conclusion and termination issues arising from automated decisions blockchain technology and AI applications particularly in the banking and finance sectors The authors are legal experts from around the world with extensive academic and or practical experience in these areas

A Research Agenda for Environmental Crime and the Law Ricardo Pereira,Teresa Fajardo,2025-06-09 This Research Agenda evaluates the current state of scholarship in the field of environmental crime and law identifying priority areas and future trends in academic research It explores the evolution of the law accounting for current and new global environmental threats and examining ontological questions around environmental law enforcement Leading experts provide insight into research methodologies and topical themes such as transnational corporate crimes ecocide artificial intelligence biodiversity crime and climate justice **Presumption of Innocence in EU Anti-Cartel Enforcement** Aisté Mickonytė,2018-11-26 In this monograph Aist Mickonyt examines the compliance of the European anti cartel enforcement procedure with the presumption of innocence under Article 6 2 of the European Convention on Human Rights ECHR The author maintains that the pursuit of manifestly severe punishment with insistence of the European Commission on administrative level procedural safeguards is inconsistent with the robust standards of protection under the Convention Arguing that EU anti cartel procedure is criminal within the meaning of the Convention this work considers this procedure in light of the core elements of the presumption of innocence such as the burden of proof and the principle of fault The author zeroes in on the de facto automatic liability of parental companies for offences committed by their subsidiaries *U.C.
