Composition as Conversation Heather M. Hoover,2023-06-27 Teaching writing is not for the faint of heart but it can be a tremendous gift to teachers and students Students often approach writing courses with trepidation because they think of writing as a mystical and opaque process Teachers often approach these same courses with dread because of the enormous workload and the often unpolished skills of new writers This approachable composition textbook for beginning writers contends that writing can be a better experience for everyone when taught as an empathetic and respectful conversation In a time in which discourse is not always civil and language is not always tended carefully a conversation based writing approach emphasizes intention and care Written by a teacher with more than fifteen years of experience in the college writing classroom Composition as Conversation explores what happens when the art of conversation meets the art of writing Heather Hoover shows how seven virtues including curiosity attentiveness relatability open mindedness and generosity inform the writing

process and can help students become more effective writers. She invites writers of all skill levels to make meaningful contributions with their writing. This short, accessible, and instructive book offers a reflective method for college level writing and will also work well in classical school, high school, and homeschool contexts. It demystifies the writing process and helps students understand why their writing matters. It will energize teachers of writing as they encourage their students to become careful readers and observers, intentional listeners, and empathetic arguers. The book also provides helpful sample assignments.

Monthly labor review. v. 3, 1916, 1916 World Development Report 2015 World Bank, 2014-12-04

Development economics and policy are due for a redesign. In the past few decades, research from across the natural and social sciences has provided stunning insight into the way people think and make decisions. Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self-interested preferences, recent research shows that decision making rarely proceeds this way. People think automatically when deciding; they usually draw on what comes to mind effortlessly. People also think socially: social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share. And people think with mental models: what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories. The World Development Report 2015 offers a concrete look at how these insights apply to development policy. It shows how a richer view of human behavior can help achieve development goals in many areas, including early childhood development, household finance, productivity, health, and climate change. It also shows how a more subtle view of human behavior provides new tools for interventions. Making even minor adjustments to a decision-making context, designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives. The Report opens exciting new avenues for development work. It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making. It emphasizes that all humans, including experts and policy makers, are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making. It demonstrates the need for more discovery learning and adaptation in policy design and implementation. The new approach to development economics has immense promise. Its scope of application is vast. This Report introduces an important new agenda for the development community.

International Labour Review, 1928

Dynamics of Wage Fixation in a Developing Economy Benedict Y. Imbun, 2008 This book is a microcosm of issues of minimum wage determination in developing countries examined in the context of Papua New Guinea (PNG). With provision of parallels, it discusses the critical issues, process, and actors involved in determination of minimum wage. Like most governments in developing countries, obsessed with economic development, the critical issue for the PNG government has been to ensure that wage levels and the wage structure harmonise as far as possible with the national development.

aspirations and on the other hand social objectives are maintained through the prevention of exploitation of workers Although the twin issues of economic efficiency and social equity have not been easily compatible this book's testimony of experiences in accommodating the issues has been the most challenging for PNG The challenges faced and lessons learnt in determining and regulating minimum wage would reflect similar experiences for many developing countries
