## **The Materiality Of Stone Explorations In Landscape Phenomenology:**

*The Materiality of Stone* Christopher Tilley, 2020-06-03 With Wayne Bennett From the silky wax qualities of the surfaces of some quartz menhirs to the wood grain textures of others to the golden honeycombed limestones of Malta to the icy frozen waves of the Cambrian sandstone of south east Sweden this book investigates the sensuous material qualities of stone Tactile sensations sonorous qualities colour and visual impressions are all shown to play a vital part in our understanding of the power and significance of prehistoric monuments in relation to their landscapes In *The Materiality of Stone* Christopher Tilley presents a radically new way of analyzing the significance of both cultural and natural stone in prehistoric European landscapes Tilley's groundbreaking approach is to interpret human experience in a multidimensional and sensuous human way rather than through an abstract analytical gaze The studies range widely from the menhirs of prehistoric Brittany to Maltese Neolithic temples to Bronze Age rock carvings and cairns in southern Sweden Tilley leaves no stone unturned as he also considers how the internal spaces and landscape settings are interpreted in relation to artifacts substances and related places that were deeply meaningful to the people who inhabited them and remain no less evocative today In its innovative approach to understanding human experience through the tangible rocks and stone of our past *The Materiality of Stone* is both a major theoretical and substantive contribution to the field of material culture studies and the study of European prehistory

*The Materiality of Stone* Christopher Y. Tilley, 2004 In *The Materiality of Stone* Christopher Tilley presents a radically new way of analyzing the significance of both cultural and natural stone in prehistoric European landscapes Tilley's groundbreaking approach is to interpret human experience in a multidimensional and sensuous human way rather than through an abstract analytical gaze The studies range widely from the menhirs of prehistoric Brittany to Maltese Neolithic temples to Bronze Age rock carvings and cairns in southern Sweden Interpreting Landscapes Christopher Tilley, 2010-06-15 Examines role of landscape in phenomenological study of ancient Britain Body and Image Christopher Tilley, 2016-09-16 The understanding and interpretation of ancient architecture landscapes and art has always been viewed through an iconographic lens a cognitive process based on traditional practices in art history But ancient people did not ascribe their visions on canvas rather on hills stones and fields Thus Chris Tilley argues the iconographic approach falls short of understanding how ancient people interacted with their imagery A kinaesthetic approach one that uses the full body and all the senses can better approximate the meaning that these artifacts had for their makers and today's viewers The body intersects the landscape in a myriad of ways through the effort to reach the image the angles that one can use to view the multiple senses required for interaction Tilley outlines the choreographic basis of understanding ancient landscapes and art phenomenologically and demonstrates the power of his thesis through examples of rock art and megalithic architecture in Norway Ireland and Sweden This is a powerful new model from one of the leading contemporary theorists in archaeology

Southwestern Ontario, Canada Christopher M. Watts, 2008 Complementary strands of thought are here woven together to further the notion that people and things are entangled in interdependent webs of action and a view of social life as engendered by the ways we apprehend and interact with the material world. It is argued that material culture can be considered agential insofar as it serves to condition certain sensory responses from its users. An analysis of Late Woodland period pottery production in southwestern Ontario provides a case study over 800 earthenware vessels are analyzed from Iroquoian and Algonquian Western Basin sites. The results suggest that Iroquoian potting practices were organized around a design repertoire to which most potters subscribed. These patterns contrast with the Western Basin assemblages which hint at a greater degree of design heterogeneity and a wider array of choice. The discordant nature of Western Basin decorative practices points to a form of human non human interaction markedly different from the milieu experienced by Iroquoian artisans.

*Rethinking Wetland Archaeology* Robert Van De Noort, Aidan O'Sullivan, 2006-03-16 Shows how wetland studies can be contextualised within geographical cultural and theoretical frameworks. This book discusses how wetland archaeological discoveries can be understood in terms of past people's perception and understanding of landscape which was not only a source of economic benefit but a storehouse of cultural values and beliefs.

**Sutton Hoo and Its Landscape** Tom Williamson, 2008 The location of the Anglo Saxon burial ground at Sutton Hoo on a ridge overlooking the estuary of the river Deben has always appeared strange and challenging. This is not so much because the site is today an isolated and lonely one but rather because it lies on the very periphery of the early medieval kingdom of East Anglia whose rulers the Wuffingas were buried there. In this extended meditation on the geography of a very special and evocative place Tom Williamson explores the meaning of the cemetery's location. To understand the location of ancient monuments we need to examine not only the character of past landscapes but also the ways that contemporaries may have experienced and felt about them we need to reconstruct aspects of their mental world. Williamson argues that the cemetery was placed where it was not in order to display power and dominance over territory but because the river and its brooding estuary had long held a special and central place in the lives and perceptions of a local society. As King Raedwald and his family rose to dominance over this river people they chose to be buried at the heart of their territory. Such approaches may help us to understand why the cemetery was established where it was within the territory of the Wuffingas but they cannot explain why that group came to dominate the whole of East Anglia. For this Williamson argues we need to examine wider geographical contexts patterns of movement contact and social allegiance which were engendered and shaped by landforms and topography at a regional and national level. It is only by joining aspects of the new phenomenological approaches to the archaeology of landscape to more traditional geographical interpretations

that we can appreciate the full significance of this important site Combining a keen understanding of local and regional geography Anglo Saxon history and current debates about approaches to past landscapes this book is a masterly exploration of the context and meaning of an iconic set of monuments
