*The Medical Library Association Consumer Health Reference Service Handbook* Donald A. Barclay, Deborah D. Halsted, Medical Library Association, 2001 Guide for librarian to help patrons find answers to health questions [The Medical Library Association Guide to Developing Consumer Health Collections](#) Claire B. Joseph, 2018-03-27 The Medical Library Association Guide to Developing Consumer Health Collections guides both library graduate school students and seasoned librarians from academic health sciences and public libraries to develop, maintain, nurture, and advertise consumer health collections. This authoritative guide from the respected Medical Library Association covers all that is involved in developing a new consumer health library, including conducting community needs assessments and forging community partnerships. Concerns about physical space, computers, and materials, funding, budgeting, and staffing, privacy, and confidentiality concerns, publicity, and advertising. This book guides both graduate library school students and seasoned librarians from all types of libraries, academic, health center, hospital, public, and school, to develop, maintain, and nurture not only consumer health collections but also community partnerships and outreach programs. Examples of librarians' innovative and creative consumer health initiatives are included. Chapters include all that is involved in developing a consumer health collection, including conducting community needs assessments, concerns about physical space, computers, and materials, budgeting, licensing, and staffing, privacy, and confidentiality concerns, and community partnership and outreach.

## **The Medical Library Association Guide to Providing Consumer and Patient Health Information** Michele

Spatz, 2014-05-01 Comprised of fifteen chapters written by experienced consumer health librarians, The Medical Library Association Guide to Providing Consumer and Patient Health Information is designed for library and information science graduate students as well as librarians new to health and medical librarianship, regardless of library setting. It is comprehensive in scope, covering all aspects of consumer and patient health and medical information from their humble grassroots beginnings to the ever-evolving applications of new technology and social media. In between the mundane aspects of health and medical librarianship, such as needs assessment, costs, budgeting, and funding, and staffing, are discussed. Adding richness to this discussion are the coverage of more sensitive topics such as patient friendly technology, ethical issues in providing consumer and patient health information, meeting the needs of diverse populations, and responding to individuals from various cultural backgrounds. No comprehensive picture of consumer and patient health librarianship would be complete without addressing the critical importance of marketing and strategic partnerships, such discussions round out this invaluable guide. Patients today must be knowledgeable enough to participate in their health and well-being. Shorter hospital stays, changing reimbursement patterns, and the gradual shift towards focusing on proactively maintaining health and managing disease require patients to be informed and actively engaged. Education, information, and understanding are important components of actively engaged patients. Correspondingly, in today's world, there is a glut of information.
