England a group of missionaries supported by the Catholic Institute for International Relations formed a steering group that was to become the Zimbabwe Project Originally an educational fund to support exiled young Zimbabweans it shifted focus toward humanitarian assistance to refugees in the region 1981 The Zimbabwe Project Trust a child of the war This lively book interrogates the African postcolonial condition with a focus on the thematics of liberation predicament and the long standing crisis of dependence epistemological cultural economic and political created by colonialism and coloniality A sophisticated deployment of historical philosophical and political knowledge in combination with the equi primordial concepts of coloniality of power coloniality of being and coloniality of knowledge yields a comprehensive and truly refreshing understanding of African realities of subalternity How global imperial designs and coloniality of power shaped the architecture of African social formations and disciplined the social forces towards a convoluted postcolonial neocolonized paralysis dominated by myths of decolonization and illusions of freedom emerges poignantly in this important book What distinguishes this book is its decolonial entry that enables a critical examination of the grammar of decolonization that is often wrongly conflated with that of emancipation bold engagement with the intractable question of what and who is an African systematic explication of the role of coloniality in sustaining Euro American hegemony and unmasking of how the postcolonial is interlocked with the neocolonial paradoxically It is within this context that the postcolonial African state emerges as a leviathan and the postcolonial reality becomes a terrain of contradictions mediated by the logic of violence No doubt Sabelo Ndlovu Gatsheni's handling of complex concepts and difficult questions of the day is remarkable particularly the decoding and mixing of complex theoretical interventions from Africa and Latin America to enlighten the present without losing historical perspicacity To buttress the theoretical arguments detailed empirical case studies of South Africa Zimbabwe DRC and Namibia completes this timely contribution to African Studies

**The Impact of Union Citizenship on the EU's Market Freedoms** Alina Tryfonidou, 2016-02-25 The book's aim is to consider the impact that the introduction and development of the status of Union citizenship has had on the interpretation of the EU's market freedoms Starting by providing in its introductory part part one a comprehensive and up to date analysis of the status of Union citizenship and its development from 1998 onwards the book proceeds in part two to provide an in depth examination of the relationship between this status and the Union's market freedoms The central argument of the book is that as a result of the move towards the creation of a meaningful status of Union citizenship the market freedoms have been reconceptualised as fundamental Union citizenship rights and their interpretation has adapted accordingly Part three of the book analyses the result of this process of transforming the market freedoms into sources of fundamental Union citizenship rights and considers where it is likely to lead in the future It

demonstrates that despite the fact that this development appears to be the next natural step in the process of constructing a meaningful notion of Union citizenship it brings with it a number of issues that the EU will have to consider and carefully address. In particular the method which the Court seems up until now to have employed to facilitate the metamorphosis of the market freedoms into citizenship rights has led to criticisms on the grounds of legitimacy and coherence and will undoubtedly lead to further problems in the future. Hence part three of the book also identifies the difficulties that may emerge as a result of this process and suggests ways in which they may be overcome.
