The Metaphysics Penguin Classics:

The Metaphysics Aristotle, 2004-05-27 The *Metaphysics* presents Aristotle's mature rejection of both the Platonic theory that what we perceive is just a pale reflection of reality and the hardheaded view that all processes are ultimately material. He argued instead that the reality or substance of things lies in their concrete forms and in so doing he probed some of the deepest questions of philosophy: What is existence? How is change possible? And are there certain things that must exist for anything else to exist at all? The seminal notions discussed in *The Metaphysics* of substance and associated concepts of matter and form, essence and accident, potentiality and actuality have had a profound and enduring influence and laid the foundations for one of the central branches of Western philosophy.

Meditations and Other Metaphysical Writings René Descartes, 2000 **Meditations and Other Metaphysical Writings** René Descartes, 2003-08-28 Of all the works of the man claimed by many as the father of modern philosophy, the *MEDITATIONS* first published in 1641 must surely be René Descartes' masterpiece. This volume consists of not only a new translation of the original Latin text and the expanded objections and replies but also includes selected correspondence and other metaphysical writings from the period 1641-49.

The Little Book Of Philosophy Andre Comte-Sponville, 2011-11-30 In this remarkable little book Andre Comte-Sponville introduces the reader to the western philosophical tradition in a series of sparkling chapters on the big questions. In doing so he reveals the essential bones of philosophical thought and shows why philosophy is relevant in our day-to-day lives. In his brilliant and concise writing on morality, politics, love, death, knowledge, freedom, God, atheism, art, time, Man, and wisdom, he inspires the central question of philosophy: how should we live? and provides the reader with signposts towards a happier, wiser life.

Analytic Islamic Philosophy Anthony Robert Booth, 2018-01-31 This book is an introduction to Islamic Philosophy beginning with its Medieval inception right through to its more contemporary incarnations. Using the language and conceptual apparatus of contemporary Anglo-American Analytic philosophy, this book represents a novel and creative attempt to rejuvenate Islamic Philosophy for a modern audience. It adopts a rational reconstructive approach to the history of philosophy by affording maximum hermeneutical priority to the strongest possible interpretation of a philosopher's arguments while also paying attention to the historical context in which they worked. The central canonical figures of Medieval Islamic Philosophy: al-Kindi, al-Farabi, Avicenna, al-Ghazali, Averroes are presented chronologically along with an introduction to the central themes of Islamic theology and the Greek philosophical tradition they inherited. The book then briefly introduces what the author collectively refers to as the Pre-Modern figures including Suhrawardi, Mulla Sadra, and Ibn Taymiyyah and presents all of these thinkers along with their Medieval predecessors as forerunners to the more modern incarnation of Islamic Philosophy: Political Islam.

Neurosis and Assimilation Charles William Johns, 2016-10-19 This book deals with the possibility of an ontological and epistemological account of the psychological category neurosis. Intertwining thoughts from German idealism, Continental philosophy, and psychology, the book shows how neurosis precedes

and exists independently from human experience and lays the foundations for a non essentialist non rational theory of neurosis in cognition in perception in linguistics and in theories of object relations and vitalism The personal essays collected in this volume examine such issues as assimilation the philosophy of neurosis aneurysmal philosophy and the connection between Hegel and Neurosis among others The volume establishes the connection between a now redundant psycho analytic term and an extremely progressive discipline of Continental philosophy and Speculative realism **Frankenstein**

Urbanism Federico Cugurullo,2021-05-16 This book tells the story of visionary urban experiments shedding light on the theories that preceded their development and on the monsters that followed and might be the end of our cities The narrative is threefold and delves first into the eco city second the smart city and third the autonomous city intended as a place where existing smart technologies are evolving into artificial intelligences that are taking the management of the city out of the hands of humans The book empirically explores Masdar City in Abu Dhabi and Hong Kong to provide a critical analysis of eco and smart city experiments and their sustainability and it draws on numerous real life examples to illustrate the rise of urban artificial intelligences across different geographical spaces and scales Theoretically the book traverses philosophy urban studies and planning theory to explain the passage from eco and smart cities to the autonomous city and to reflect on the meaning and purpose of cities in a time when human and non biological intelligences are irreversibly colliding in the built environment Iconoclastic and prophetic Frankenstein Urbanism is both an examination of the evolution of urban experimentation through the lens of Mary Shelley s Frankenstein and a warning about an urbanism whose product resembles Frankenstein s monster a fragmented entity which escapes human control and human understanding Academics students and practitioners will find in this book the knowledge that is necessary to comprehend and engage with the many urban experiments that are now alive ready to leave the laboratory and enter our cities **The New Heroines** Kathryn

Wright,2016-03-21 This book explores how the next generation of teen and young adult heroines in popular culture are creating a new feminist ideal for the 21st century Representations of a teenage girl who is unique or special occur again and again in coming of age stories It s an irresistible concept the heroine who seems just like every other but under the surface she has the potential to change the world This book examines the cultural significance of teen and young adult female characters the New Heroines in popular culture The book addresses a wide range of examples primarily from the past two decades with several chapters focusing on a specific heroic figure in popular culture In addition the author offers a comparative analysis between the New Woman figure from the late 19th and early 20th century and the New Heroine in the 21st century Readers will understand how representations of teenage girls in fiction and nonfiction are positioned as heroic because of their ability to find out about themselves by connecting with other people their environment and technology
