The Martian Ones

Gabriel Hugo, 2017-08-03 Contrary to The Martian by Andy Weir in which Matt Damon resolves to science the shit out of this these characters have a much bleaker outcome on Mars because of the company they keep other humans The mission to Mars is doomed Just like the mission to Earth has been a colossal failure We had one job to do when God or the aliens put us here on this planet team work Instead we are at the brink of extinction This book explores scenarios about the way in which humanity botches the proposed mission to colonize Mars through a series of tales of human folly From an evil scientist bent on creating a human alien race to kill off and replace people Martian pioneers lost in space and Martian colonists murdering and raping in the absence of law and order to cannibalism public executions and a zombie virus outbreak that infects everyone all the way up to the President of the United States It seems that no scenario is favorable for humanity's dream of reaching the stars other than perhaps by ceasing to be human altogether
