The Media And Modernity A Social Theory Of The Media:

The Media and Modernity John B. Thompson, 1995 What role have communication media played in the formation of modern societies How should we understand the social impact of new forms of communication and information diffusion from the advent of printing in fifteenth century Europe to the expansion of global communication networks today In this major new work Thompson addresses these and other questions by elaborating a distinctive social theory of communication media and their impact He argues that the development of communication media has transformed the spatial and temporal constitution of social life creating new forms of action and interaction which are no longer linked to the sharing of a common locale The consequences of this transformation are far reaching and impinge on many aspects of our lives from the most intimate aspects of personal experience and self formation to the changing nature of power and visibility in the public domain Combining breadth of vision with sensitivity to detail this book situates the study of the media where it belongs among a set of disciplines concerned with the emergence development and structural characteristics of modern societies and their futures

Emancipation, the Media, and Modernity : Arguments about the Media and Social Theory Nicholas Garnham, 2000-04-06 This book adopts a polemical stance It approaches the problems raised by the media by way of a set of arguments with the two dominant paradigms now current for thinking about the media: post modernism and Information Society theory It argues that the media are important because they raise a set of questions that have been central to social and political theory since the Enlightenment In a series of probes into different sets of questions raised by the media the argument of the book focuses on the problem raised by what Kant called the unsocial sociability of human kind Under what conditions could autonomous free individuals live in viable social communities Or to put it another way what are the related scope for and limits on human reason and emancipation In conducting this argument the book first argues for a necessarily historical perspective It then goes on to examine the implications for emancipation of seeing the media as cultural industries within the wider systems world of the capitalist market economy of seeing the media as technologies of the specialisation of intellectual production and of the

separation and increasing social distance between the producers and consumers of symbols It then goes on to argue against current ethnographic trends in audience research and against the focus on everyday life for a reinstatement of interest in the statistical reality of audiences and effects and for a recognition through a return to the Hegelian roots of commodity fetishism and the symbolic interactionist creation of identities that an active audience can be actively involved in its own domination The argument then turns to the problem of how we evaluate the symbolic forms that the media circulate and whether such evaluation can be anything more than a matter of personal taste It is argued that evaluation is in practice unavoidable and without some standards that are more than just subjective any criticism of the medias performance is impossible Via an examination of the debate between the sociology of art and aesthetics it argues for the ethical foundations of aesthetic judgement and for the establishment of agreed standards of aesthetic judgement via the discourse ethic that underlies the argument of the entire book This foregrounding of the discourse ethic then leads on to a discussion of the media and politics Here the argument is that arguments about the media and politics are at the heart of arguments about politics itself These arguments focus it is argued upon the shifting division between the public and the private Here the book returns to the roots of public sphere theory in Rousseaus arguments for the centrality of public spectacle and Kants
