The Modern Day Spartan The Intrapreneur:

The Intrapreneur Gib Bulloch, 2018-04-05 Work Eat Sleep Repeat Work Eat Sleep Repeat Work Eat Sleep Repeat Have you ever sat at your desk and asked yourself why am I here Is this really all there is Believe me it isn't Over the past three decades my generation created the enormous machines we call multinational corporations Today over half of the largest economies in the world are global businesses controlled by the few while impacting the many Business has the power to change the world But what if we as individuals had the power to change the world of business We are in the age of the intrapreneur where mavericks and rebels bring their entrepreneurial prowess to big business to change it from the inside out and bottom up The Intrapreneur is the story of my dream to do exactly that and how you can too For over a decade I led a team within one of the world's largest global consulting organisations a corporate guerrilla movement working deep within the system to try to change the system Our goals were huge we wanted to revolutionise the role of business in the aid and development sector and offer our skills and expertise to not for profits in parts of the world with greatest need but least access This was my dream but until now I have never admitted the personal toll that it took on me It ultimately cost me my job my health and perhaps even my sanity as I landed myself in a psychiatric hospital for five days and five nights I had found my purpose but had I lost my mind The Intrapreneur is a call to action for a new breed of social activist working within about to join or completely disillusioned by today's business world to be the change you want to see in your company So my message is a simple one If you feel that description applies to you either change company or better still change the company you're in for the better If we strive to create the organisations we desire to work in which build the societies we want to live in then we'll be helping not only ourselves and our colleagues but the world as a whole Join us today **Cycles, Crises,**

Innovation Jerry Courvisanos, 2012-05-01 Reflection on the history of opinion and its application to our contemporary world and controversies over technology and our environmental difficulties is the distinguishing feature of the thoughtful economist If the reader of this book is moved to reflect on the work of Schumpeter and Kalecki the author of this book will have succeeded Even more important than this if the reader of this book comes to a changed and deeper understanding of how technology changes in our faltering capitalist economies and of how the environment is affected by production and may be improved with better ways of satisfying our personal and productive needs then the author will have done an even greater service to his profession and humanity From the foreword by Jan Toporowski School of Oriental and African Studies University of London UK Jerry Courvisanos provides us with a timely analysis of the forces behind the crises of capitalism and the tendency towards ecologically unsustainable growth He draws on the work of two of the most creative if not most recognized economists of the 20th Century Michal Kalecki and Joseph Schumpeter In place of mainstream analysis with its emphasis on marginal conditions for optimisation around well defined equilibrium we have a world of innovation structural change creative destruction business cycles financial crises changing income distribution and many other inconvenient developments

that plague modern economies From the foreword by Harry Bloch Curtin University Australia Cycles crises and innovation are the major economic forces that shape capitalist economies Using a critical realist political economy approach the analysis in this fine work is based on the works of Micha Kalecki and Joseph Schumpeter both of whom identify these three dynamic forces as plotting the path of economic development Jerry Courvisanos thought provoking book examines how the rise of capital through investment enshrines innovation in profit and power which in turn determines the course of cycles and crises The author concludes by arguing for strategic intervention by transformative eco innovation as a public policy path to ecologically sustainable development This interdisciplinary book will appeal to economists innovation and entrepreneurship based scholars postgraduate students studying the political economy of both innovation and entrepreneurship regional development planners and economic development policymakers Anyone with a general interest in economics politics and innovation or looking for a path out of the economic and ecological morass of current capitalism will also find much to interest them in this book
